BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost.

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

A Trip Through Yellowstone Park

is what everyone hopes to have—**some day**. It is the most wonderful trip in the world. There are more than 3,000 square miles of weird, marvelous, unimaginable things that can be seen nowhere else, therefore if one ever sees them one **must** go to the Park, in the heart of the magnificent Rockies with snow tipped peaks all around. If Old Faithful geyser, a Paint Pot, Mud Volcano, or Emerald Pool were to be found in Lincoln Park, Chicago; Central Park, New York; or Fairmount Park, Philadelphia; the people would flock to see it or them by tens of thousands. For a very small sum, comparatively, all these and hundreds more of nature's unduplicated marvels can be seen between June 1 and September 30, of each year, and one will enjoy, to boot, the best coaching trip in the country.

The **Northern Pacific** folder on Yellowstone Park, just issued, is a new, right up to date, finely illustrated dessertation on this Yellowstone Park trip. It is not descriptive, but deals with the detailed, technical matters everyone needs to know about such a trip. It tells all about the hotels, the stage coaches, the roads, the cost of the tour; where the geysers, the waterfalls, the bears, the canyons are, and where the trout fishing is found. We have printed thousands of this beautiful leaflet and want everybody interested to have a copy, and it can be obtained by sending A. M. Cleland, General Passenger Agent, St. Paul, Minn., **two cents** with proper address.

"Wonderland 1904" which is a very fine pamphlet of 116 pages, descriptive of the Northwest, including the Park, will be sent for **six cents.**

Good Advice

No. 6

If you have not yet tried a Duncan Wattmeter for your Direct Current service, send for one of our latest high torque type. They have 12 per cent greater turning moment than any meter on the market. This means extreme accuracy on low loads for an indefinite period and a positive earning on your small load service. A meter sent on 30 days trial to prove our assertion, tells the story.

Good Advice No. 7 Next Week

Allis-Chalmers Co
CHICAGO

5000 horsepower Allis-Chalmers Engine

Machinery Hall, World's Fair, St. Louis.

WHAT IT HAS DONE

Began unloading from train Jan. 15th 27 carloads – Generator 10 carloads.
Steam first turned on April 20th, Engine and Generator operated perfectly ever since.
St. Louis Exposition officially opened April 30th, 1904.

Decorative lighting of Exposition Buildings and Grounds first turned on evening April 29th, this Engine and Generator carrying the load.

Ran non-condensing one month while Exposition was getting its condenser plant erected and connections made. During that time carried 4300 horsepower night after night.

Sometimes required to operate the Cascades,—2000 horsepower.

Exposition having finished its condenser plant, the Engine was required to take full load June 10th. That night the unit carried 4800 horse power. Began with 26-inch vacuum—no load—which, under load, ran down to about 14 inch, or 7 to 8 pounds. Engine has never been out of commission, except for two nights when a sewer burst and flooded the wheel-pit.

Since then Engine ran condensing until July 25th,—carrying 4800 horsepower with from 13 to 16 inches vacuum. On July 25th a break occurred in the Exposition discharge pipe which takes the condenser water to the Lagoon. The Engine then ran non-condensing for two nights. It carried 4400 horsepower during that time. On July 28th ran condensing,—since then it has regularly carried 5600 horsepower with 15 inches vacuum.

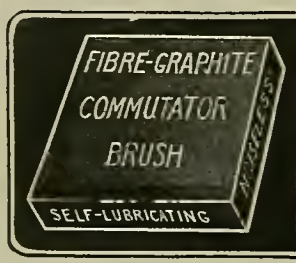
"MANROSS"
HAIR SPRINGS
For Electric Indicating and Recording Gauges, Steam Gauges, Etc

LARGEST MANUFACTURER OF
HAIR SPRINGS in the United States.
F. N. MANROSS,
FORESTVILLE, CONN.



There's No Friction
with the Fibre-Graphite Commutator Brush. Being 90 per cent. pure graphite, it insures low resistance, no sparking under a varying load, and longer wear. There is no greasing required. The Fibre-Graphite is therefore the most economic brush on the market. Send for price list.
HOLMES FIBRE-GRAPHITE MFG. CO.
5155 Wakefield St., Germantown, PHILADELPHIA.

THE GENERAL ELECTRIC COMPANY
DEFEATED BY
The Yost Electric Manufacturing Company

Painter patent for insulating lining made of a single piece of fiber tubing held to be void for want of Patentable Novelty in view of Prior Art.

This decision was handed down by Judge Hazel of the United States Circuit Court in the Southern District of New York, filed July 30, 1904, in a suit brought by The General Electric Company against The Yost Electric Manufacturing Company of Toledo, Ohio.

Yost Sockets and Electrical Specialties save you time, labor and annoyance. Full information for the asking. Catalogue free.

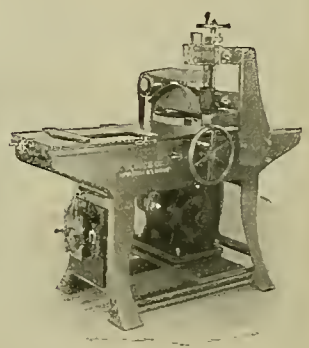
Engineering TAUGHT BY CORRESPONDENCE
Our system of training by mail has helped thousands held down in poor positions to rise to better salaries and situations. Your chance to rise is just as good as others. Write for our free illustrated book, "Can I Become An Electrical Engineer?" We teach by mail, Electrical Engineering, Mechanical Engineering, Steam Engineering, Mechanical Drawing, Electric Lighting, Electric Railways. ELECTRICAL ENGINEER INSTITUTE, Dept. K, 240 West 23rd St., New York.

Crocker-Wheeler. Brown, Boveri.

By arrangement with the celebrated electrical engineers, Brown, Boveri & Cie. of Baden, Switzerland, the Crocker - Wheeler Company has secured their alternating current designs, patents and rights to manufacture in America, and has retained them as consulting engineers.

Crocker-Wheeler Company is now putting on the market alternating current generators, transformers and accessories of the most perfect design and construction, adapted to American practice. Opportunities to bid on this apparatus are invited.

DIRECT CURRENT
MOTORS



THE ADAPTATION of our motors to mechanical drive is practically universal, and their service is unequaled.

Write for Bulletin No. 21814.

EDISON PRIMARY BATTERIES FORMERLY EDISON LA LANDE

There is no deterioration in the permanent parts of these batteries. It follows, therefore, that each time a cell is recharged it will last as long a time and deliver as heavy a current as the original charge when the cell was first put into service. Our catalogue No. 7 will tell you more about this. Let us send it.

Economical Turn Down LAMP "PATENTS"

Our PATENT COUNSEL after careful EXAMINATION and SEARCH, advises us there is

NO INFRINGEMENT

of the Phelps Patents by the

ECONOMICAL ELECTRIC LAMP COMPANY

and that the **Economical Turn Down Lamps** are made under and protected by patents

No. 740,369,	Patented Sept. 29, 1903,	Application	Dec. 10, 1902
No. 676,814	" June 11, 1901	"	April 2, 1901
No. 676,068	" June 11, 1901	"	Oct. 11, 1900
No. 676,069	" June 11, 1901	"	April 1, 1901
No. 732,644	" June 30, 1903	"	Dec. 30, 1902

which are **Good** and **Valid Patents.**

BABY FILAMENTS are known to the *art* and have been in use in this and other countries since 1882, and thus the *broader* claims of the Phelps Patents having been anticipated by other patents are INVALID.

The usual cry of INFRINGEMENT and IMITATION was employed by the Phelps Company as soon as our "ECONOMICAL LAMP" was put on the market in October, 1902, the *trade* at once saw the SUPERIORITY of ours over all other *Turn Down Lamps* and have found INCREASED and READY *sales* because of such SUPERIORITY and its SIMPLICITY.

On February 11th, 1903, we made a demand directly on the Phelps Company to begin suit *against us* to permit the courts to adjudicate the validity of their patents, this they *refused* to do, but instead, after having waited so long a time, sued several of our customers, which is done only to annoy them, and attempt to INTIMIDATE the trade, and is in our opinion a *bluff* to try and force the customers sued to handle the Phelps Company INFERIOR product.

We PROMPTLY assumed the DEFENSE of the suits against our customers and will do likewise for all whom the Phelps Company may bring action against for selling or using the

ECONOMICAL TURN DOWN LAMPS

We know that our *Customers* and the *Trade* will not permit the Phelps Company's action to work to our mutual injury, and will continue the sale of our *Lamp,* which is

NO INFRINGEMENT OR IMITATION

NEW YORK, August 22, 1904.

ECONOMICAL ELECTRIC LAMP COMPANY
123 Liberty Street

ELECTRICITY FOR ENGINEERS. 424 PAGES. ILLUSTRATED. PRICE $2.50.
ELECTRICIAN PUBLISHING CO.,
510 Marquette Building, • • CHICAGO.

THE MONTH OF SEPTEMBER 1904

will be a memorable one in electrical circles.

The International Electrical Congress,

The American Institute of Electrical Engineers,

The National Electrical Contractors' Association,

The Northwestern Electrical Association,

The International Association of Municipal Electricians,

The American Electrochemical Society,

The American Electrotherapeutic Association

will all meet in St. Louis during the week beginning September 12th. The Independent Telephone Association of the U. S. will hold its annual meeting in St. Louis beginning September 21. A number of State conventions will also be held during the month.

The September issues of the WESTERN ELECTRICIAN, therefore, will prove unusually interesting to everyone in any way connected with the trade.

Advertisers will find these numbers well worthy of extra space, and it will pay those not regularly represented to begin a standing card now.

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

A Trip Through Yellowstone Park

is what everyone hopes to have—**some day**. It is the most wonderful trip in the world. There are more than 3,000 square miles of weird, marvelous, unimaginable things that can be seen nowhere else, therefore if one ever sees them one **must** go to the Park, in the heart of the magnificent Rockies with snow tipped peaks all around. If Old Faithful geyser, a Paint Pot, Mud Volcano, or Emerald Pool were to be found in Lincoln Park, Chicago; Central Park, New York; or Fairmount Park, Philadelphia; the people would flock to see it or them by tens of thousands. For a very small sum, comparatively, all these and hundreds more of nature's unduplicated marvels can be seen between June 1 and September 30, of each year, and one will enjoy, to boot, the best coaching trip in the country.

The **Northern Pacific** folder on Yellowstone Park, just issued, is a new, right up to date, finely illustrated dessertation on this Yellowstone Park trip. It is not descriptive, but deals with the detailed, technical matters everyone needs to know about such a trip. It tells all about the hotels, the stage coaches, the roads, the cost of the tour; where the geysers, the waterfalls, the bears, the canyons are, and where the trout fishing is found. We have printed thousands of this beautiful leaflet and want everybody interested to have a copy, and it can be obtained by sending A. M. Cleland, General Passenger Agent, St. Paul, Minn., **two cents** with proper address.

"Wonderland 1904" which is a very fine pamphlet of 116 pages, descriptive of the Northwest, including the Park, will be sent for **six cents.**

MENTION WESTERN ELECTRICIAN. LOCKPORT, N.Y. CHICAGO, ILL.

Every

Westinghouse Precision Wattmeter

Has at least 2,000 Readable Deflections

The Scale is a five-inch circle on a silvered dial, and has 200 or 250 accurately spaced divisions. The vernier affords readings of tenths of divisions without calculation.

For Calibrating

Integrating Wattmeters, a style is furnished with three current ranges of maximum capacity of 5, 20 and 100 amperes. With resistance suitable for 100 volts, this instrument will accurately measure from 10 to 10,000 watts, and proportional values at other voltages.

In Operation

When current passes through the instrument, the sight wire is drawn to the right; by turning the knurled head in the center of the dial the vernier pointer is moved to the left until the sight wire is brought back to zero. Fine adjustment is obtained by the knurled knob shown at the right.

Equally Accurate on Direct and Alternating Currents

Compare the accuracy of the machine-divided scale with the uneven divisions of the hand-drawn scales of ordinary standard instruments. The fine hairline of the sight wire with the pointer ordinarily employed. The long range of this instrument with the short range of readable deflections of others.

The Westinghouse Department of Standards will calibrate free of cost to owner, excepting expense of carriage, any Westinghouse Instrument of Precision received within five years from date of purchase; compare this with calibration service elsewhere obtainable.

These Instruments
made only by

Free Calibration

Good Advice

No. 7.

A low torque Direct Current Wattmeter is like a sickly child, in that it has to be continually doctored and attended to. When purchasing a meter for Direct Currents, be careful in your choice. Don't buy a "weak" one simply because it is cheap, or an alleged "strong" one on the strength of its ancestral history. The meter that holds the highest record for accuracy, permanency and torque is the one you want; it's the Duncan.

Good Advice No. 8 Next Week.

Allis-Chalmers Co
CHICAGO

5000 horsepower Allis-Chalmers Engine

Machinery Hall, World's Fair, St. Louis.

WHAT IT HAS DONE

Began unloading from train Jan. 15th—27 carloads—Generator 10 carloads.

Steam first turned on April 20th, Engine and Generator operated perfectly ever since.

St. Louis Exposition officially opened April 30th, 1904.

Decorative lighting of Exposition Buildings and Grounds first turned on evening April 29th, this Engine and Generator carrying the load.

Ran non-condensing one month while Exposition was getting its condenser plant erected and connections made. During that time carried 1300 horsepower night after night.

Sometimes required to operate the Cascades,—2000 horsepower.

Exposition having finished its condenser plant, the Engine was required to take full load June 10th. That night the unit carried 4800 horsepower. Began with 26-inch vacuum—no load—which, under load, ran down to about 14 inch, or 7 to 8 pounds. Engine has never been out of commission, except for two nights when a sewer burst and flooded the wheel-pit.

Since then Engine ran condensing until July 25th,—carrying 4800 horsepower with from 13 to 16 inches vacuum. On July 25th a break occurred in the Exposition discharge pipe which takes the condenser water to the Lagoon. The Engine then ran non-condensing for two nights. It carried 4400 horsepower during that time. On July 28th ran condensing,—since then it has regularly carried 5600 horsepower with 15 inches vacuum.

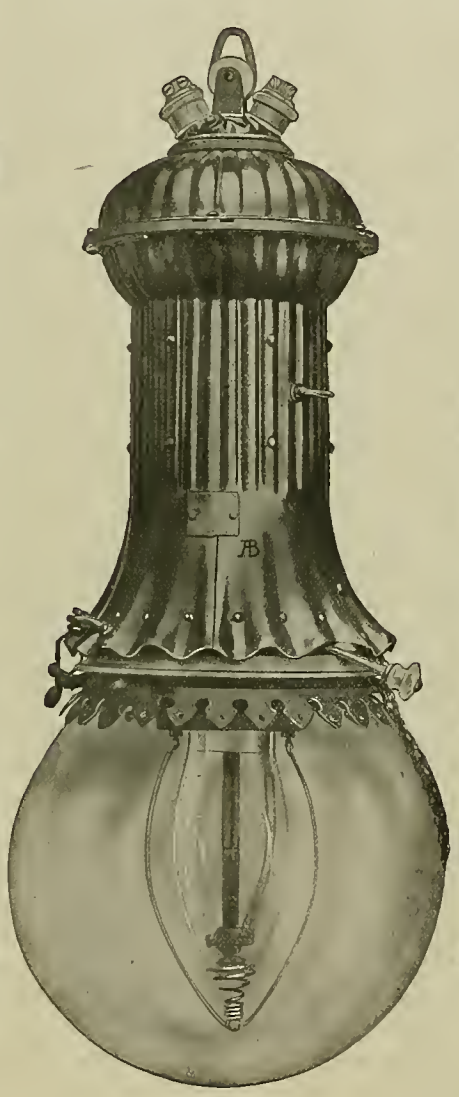
304 PEARL STREET, - - - PROVIDENCE, R. I., U. S. A.

A-B ARC LAMPS

FOR ALL CIRCUITS



SPECIAL FEATURES

Accessibility of Mechanism,

Ease of Removing Inner and Outer Globe,

Ease of Trimming,

Weatherproof Construction,

Stamped Copper Cases and Simplicity of Mechanism.

THERE IS

A greater number of Adams-Bagnall Constant Direct Current Series Enclosed Arc Lamps used for street lighting throughout the United States, Canada and Mexico than all other makes of this type of lamp combined.

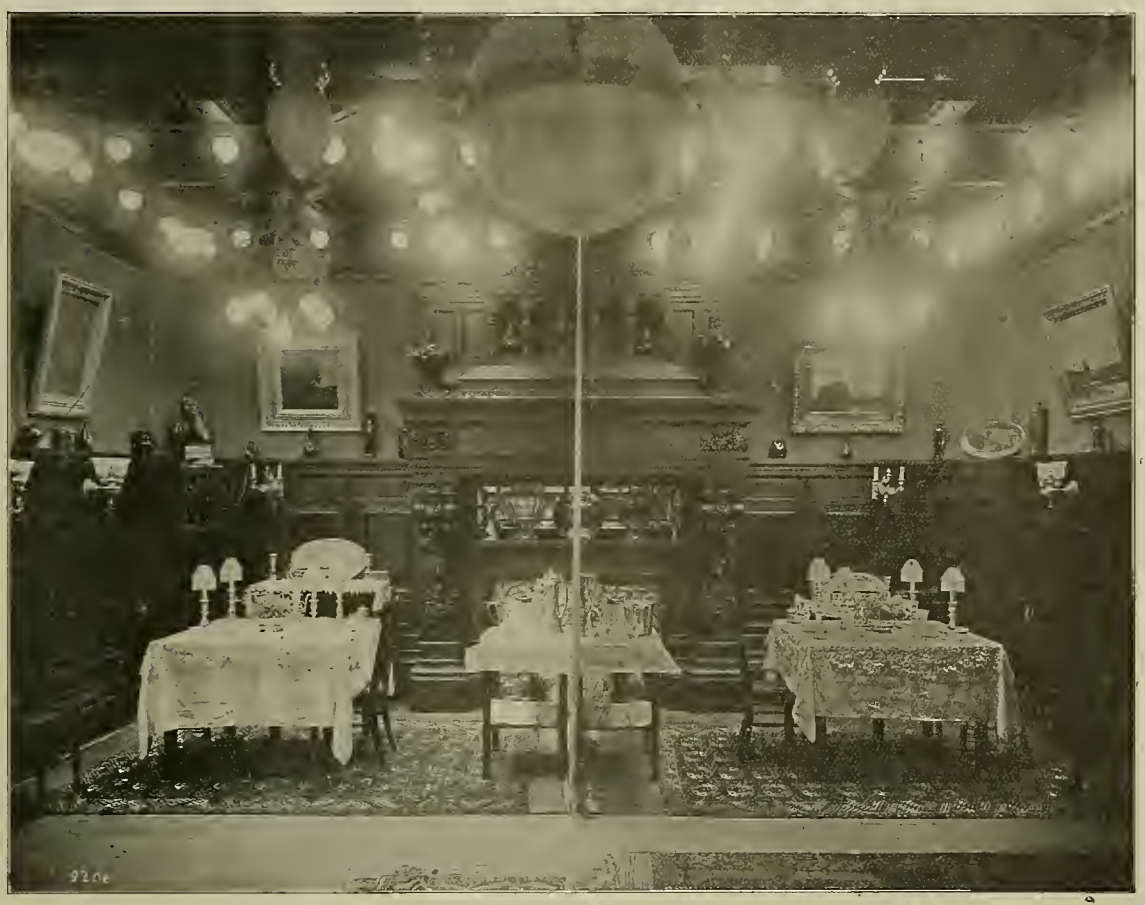
HOLOPHANE GLASS CO'S EXHIBIT

ELECTRICITY BUILDING, WORLD'S FAIR

ST. LOUIS, MO.



No one interested in electricity, electric lighting, or illumination in general who visits the St. Louis fair should fail to visit the Holophane Glass Co's exhibit of scientific glassware, and especially to see the demonstrations made in their dark rooms of the merits of Holophane globes and reflectors for giving a much higher illuminating return from artificial lights than can be obtained from any of the ordinary glass globes and reflectors now so generally used.

The Holophane Glass Co. claim that their scientific glassware gives a much higher light return than can be obtained from any other glass globes and reflectors, and also that an intelligent use of the different globes and reflectors designed by them for different light distribution enables any architect or engineer to not only get the greatest illuminating results from a given quantity of artificial light, but to practically get exactly the light distribution that is needed to suit each case.

After careful tests made in their own laboratories, the following electric lamp manufacturers not only thoroughly endorse the scientific and practical merits of Holophane scientific glassware, but intend to make large use of it in connection with their lamps:

General Electric Co.
Bryan-Marsh Co.
The Columbia Inc. Lamp Co.
Western Electric Co.
The Buckeye Electric Co.
The Fostoria Inc. Lamp Co.
The Shelby Electric Co.
The Sunbeam Inc. Lamp Co. of Canada, Ltd.
Independent Incandescent Lamp Co.
The Warren Electric & Specialty Co.
The Colonial Electric Co.
New York & Ohio Co.
Brilliant Electric Co., Etc., Etc.

HOLOPHANE GLOBES AND REFLECTORS ARE FOR SALE BY ALL FIRST-CLASS ELECTRICAL DEALERS IN THE UNITED STATES.

C&H Field Regulator

THE BEST, THE SIMPLEST AND THE MOST DURABLE FIELD REGULATOR ON THE MARKET

WHY

It has no enamel to crack; will not ground; white hot wire tests have proven worth of resistance material; will carry overloads safely; no small parts to get out of order; no loose contacts to bother with; made of the best material; easily controlled; will not stick; jar of machinery will not deviate lever.

510 Marquette Building, Chicago

EDISON PRIMARY BATTERY

FORMERLY EDISON—LALANDE

Each type of Edison Primary cells is constructed to fill special requirements of the electrical profession. For instance we recommend:—

Type BB for Slot Machines, Gas Engines and Annunciators.
Type Q for Gas Engines, Small Fan Motors, Spark Coils, Large Annunciators, Burglar Alarms and Slot Machines.
Type RR for Gas Engines, Railroad Crossing Signals, Fan Motors, Phonographs, District Telegraph, Fire Alarm Telegraph, Local and Main Line Batteries, Turntable Motors, Electro-plating and Slot Machines.
Type S for Fan Motors, Phonographs, Electro-plating, Chemical Analysis, Miniature Lamps, Sewing Machines and X-Ray Coils.

Details about them in catalogue No. 7. Send for it.

The S. K. C. Inductor Alternator

Ability to Start Up
Oil Up
Shut Up
and occasionally Clean Up

is all that is required to operate the Inductor Alternator as built by the Stanley Electric Manufacturing Company.

Does simplicity appeal to you? You have it in the Inductor with no moving wires, brushes, commutator or collector rings.

Do you desire inexpensive operation? The Inductor has nothing to renew, and only the bearings require attention.

Are your facilities for handling machinery limited? The Inductor is not difficult to install.

Bulletins Nos. 123 and 128 tell all about it. Send for them.

ELECTRIC APPLIANCE COMPANY
ELECTRICAL SUPPLIES
CHICAGO AND SAN FRANCISCO

You've Heard of the
PEERLESS
INCANDESCENT LAMPS

If you don't know them you are missing a great light giving bulb of incandescence that is electrically and mechanically perfect and rightly named "Peerless."

They are not labeled one way and rated another. Restassured when you are buying "Peerless" lamps you are getting full rated candlepower.

The Wesco guarantee stands behind every "Peerless" lamp for efficiency, sustained candlepower, current-consumption and life.

On yearly contracts we are prepared to make the lowest price that has ever been made on a strictly high grade lamp.

SAMSON TURBINE

A gain of 3% in EFFICIENCY means 3 H. P. additional in each 100 H. P. You can soon figure out what this would amount to at the end of the year. Very HIGH EFFICIENCY at all gateages is one of the strong points in a SAMSON TURBINE.

Encourage Shop Keepers

To Install Electric Lights.

BY DISPLAYING OUR SELF-PROPELLING, COLOR-REFLECTING SHOW LIGHT

you not only advertise your own business but promote their use among shop keepers, thus getting new users of current.

LASTS A LIFETIME. ONE INCANDESCENT GLOBE OPERATES IT WITHOUT FURTHER ATTENTION.

DESCRIPTION

Before an artfully constructed large concave mirror-reflector a beautiful globe covered with magnificent stones in different colors is supported on chains by a fan-wheel, which runs with its steel point in a jewel knob. The light has its place in the center of the globe, wonderfully glittering and shining through the colored stones and the skillfully placed openings in the metal parts of the globe. The heat from the electric bulb light brings the fan-wheel into rotation and the globe revolves around the light. The whole mirror-screen is covered with the reflecting of the bright stones, always changing colors.

The whole effect is one of such unspeakable beauty that no picture is able to give a description of it; the colors move like in a kaleidoscope, but have such a splendor that every comparison is displaced.

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Dobbs. 106 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 352 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on the subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Dobbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 168 illustrations. Price $1.25.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price, $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. 136 pp.; illustrated. Price $1.00.

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

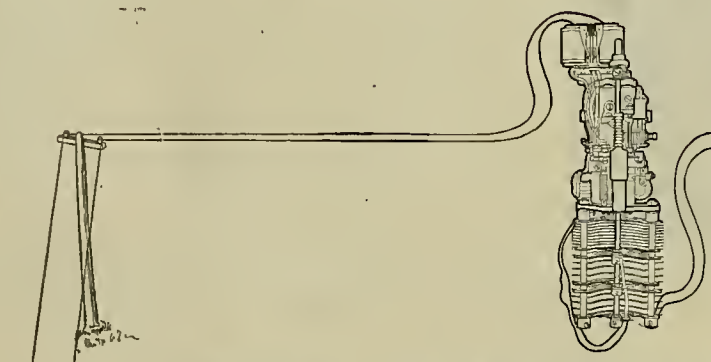
DON'T FAIL TO VISIT OUR NEW FACTORY

CENTRAL TELEPHONE AND ELECTRIC CO.
N. E. CORNER 22ND AND LUCAS AVE., ST. LOUIS



THE POSSIBILITIES OF AUTOMATIC TELEPHONY

are strikingly demonstrated by the equipments we have installed in the cities named below and in our working exhibit at the St. Louis World's Fair, Section 24, Palace of Electricity.

We have installed there two complete Automatic Telephone Exchanges of the 10,000 type, each having 100 stations.

Ours is the only perfect working, absolutely Automatic Telephone System, adaptable to any size exchange, that has been adopted and is in general use in this or any other country. It has long since passed the "trying-on" stage and when you buy our system you invest your money in experience, not in experiments. Our system is rapidly being adopted by progressive Independent Telephone Companies to replace manual boards and is proving profitable to the operating companies, and satisfactory to the patrons.

Among the principal places where it has been adopted are

Chicago, Ill.	Sioux City, Iowa.
Grand Rapids, Mich.	Cleburne, Texas.
Columbus, Ohio.	Columbus, Ga.
Dayton, Ohio.	Augusta, Ga.
Lincoln, Neb.	Medford, Wis.
Portland, Maine.	St. Mary's, Ohio.
Auburn, New York.	Woodstock, N. B.
Lewiston, Maine.	Westerly, R. I.
Auburn, Maine.	Manchester, Iowa.
Fall River, Mass.	Princeton, N. J.
New Bedford, Mass.	Albuquerque, N. M.
Los Angeles, Cal.	Battle Creek, Mich.
San Diego, Cal.	Van Wert, Ohio, and
Hopkinsville, Ky.	Berlin, Germany.

You are cordially invited to inspect our exhibition exchange at the World's Fair. It will be well worth your while. If you cannot do so, write to us for information.

5000 horsepower Allis-Chalmers Engine
and Bullock, 3,500 K. W. Generator
Machinery Hall, World's Fair, St. Louis.

WHAT IT HAS DONE

Began unloading from train Jan. 15th—27 carloads—Generator 10 carloads.
Steam first turned on April 20th, Engine and Generator operated perfectly ever since.
St. Louis Exposition officially opened April 30th, 1904.

Decorative lighting of Exposition Buildings and Grounds first turned on evening April 29th, this Engine and Generator carrying the load.

Ran non-condensing one month while Exposition was getting its condenser plant erected and connections made. During that time carried 4300 horsepower night after night.

Sometimes required to operate the Cascades,—2000 horsepower.

Exposition having finished its condenser plant, the Engine was required to take full load June 10th. That night the unit carried 4800 horsepower. Began with 26-inch vacuum—no load—which, under load, ran down to about 14 inches, or 7 to 8 pounds. Engine has never been out of commission, except for two nights when a sewer burst and flooded the wheel-pit.

Since then Engine ran condensing until July 25th,—carrying 4800 horsepower with from 13 to 16 inches vacuum. On July 25th a break occurred in the Exposition discharge pipe which takes the condenser water to the Lagoon. The Engine then ran non-condensing for two nights. It carried 4400 horsepower during that time. On July 28th ran condensing,—since then it has regularly carried 5600 horsepower with an average of 12 inches vacuum.

C & H Field Regulator

The best, the simplest and the most durable field regulator on the market.

WHY ?

Has no enamel to crack; will not ground; white hot wire tests have proven worth of resistance material; will carry overloads safely; no small parts to get out of order; no loose contacts to bother with; made of best material throughout; easily controlled; will not stick, nor will jar of machinery deviate lever.

HOLOPHANE GLASS CO'S EXHIBIT

ELECTRICITY BUILDING, WORLD'S FAIR

ST. LOUIS, MO.

No one interested in electricity, electric lighting, or illumination in general who visits the St. Louis fair should fail to visit the Holophane Glass Co's exhibit of scientific glassware, and especially to see the demonstrations made in their dark rooms of the merits of Holophane globes and reflectors for giving a much higher illuminating return from artificial lights than can be obtained from any of the ordinary glass globes and reflectors now so generally used.

The Holophane Glass Co. claim that their scientific glassware gives a much higher light return than can be obtained from any other glass globes and reflectors, and also that an intelligent use of the different globes and reflectors designed by them for different light distribution enables any architect or engineer to not only get the greatest illuminating results from a given quantity of artificial light, but to practically get exactly the light distribution that is needed to suit each case.

After careful tests made in their own laboratories, the following electric lamp manufacturers not only thoroughly endorse the scientific and practical merits of Holophane scientific glassware, but intend to make large use of it in connection with their lamps:

General Electric Co.
Bryan-Marsh Co.
The Columbia Inc. Lamp Co.
Western Electric Co.
The Buckeye Electric Co.
The Fostoria Inc. Lamp Co.
The Shelby Electric Co.
The Sunbeam Inc. Lamp Co. of Canada, Ltd.
Independent Incandescent Lamp Co.
The Warren Electric & Specialty Co.
The Colonial Electric Co.
New York & Ohio Co.
Brilliant Electric Co., Etc., Etc.

HOLOPHANE GLOBES AND REFLECTORS ARE FOR SALE BY ALL FIRST-CLASS ELECTRICAL DEALERS IN THE UNITED STATES.

The S. K. C. Inductor Alternator

Ability to Start Up
Oil Up
Shut Up
and occasionally Clean Up

is all that is required to operate the Inductor Alternator as built by the Stanley Electric Manufacturing Company.

Does simplicity appeal to you? You have it in the Inductor with no moving wires, brushes, commutator or collector rings.

Do you desire inexpensive operation? The Inductor has nothing to renew, and only the bearings require attention.

Are your facilities for handling machinery limited? The Inductor is not difficult to install.

Bulletins Nos. 123 and 128 tell all about it. Send for them.

The Stanley Electric Manufacturing Company
Pittsfield, Massachusetts, U. S. A.

Monitor Bushings

Greatest efficiency at least cost. Absolute protection to wires drawn over conduit ends. Made of one piece of sheet steel and cannot be broken. Enameled insulation. No special tools required to attach. Approved by fire underwriters. Write for bulletin 1002.

POSITION WANTED.

By young man as superintendent of electric light plant or municipal light and water plant. Ten years' practical experience and technical education. Can handle engineering and business ends. Would consider electric railway or salesman's positions. Address BOX 390, care of Western Electrician, 510 Marquette Building, Chicago.

POSITION WANTED.

As manager, superintendent or electrical engineer of light or power plant; or would considar other positions in the electrical line where a man of trust and ability is needed. Eleven years' experience. Very best references. Thirty-four years old. Address BOX 393, care Western Electrician, 510 Marquette Bldg., Chicago.

POSITION WANTED.

As superintendent, electrician or engineer, in electric light or water-works plant; have had 16 years' experience with dynamos, motors, arc lamps, meters, inside wiring and construction work; have had 20 years with boilers, engines and water-works machinery. Will guarantee results. Address BOX 394, care Western Electrician, 510 Marquette Bldg., Chicago.

POSITION WANTED.

Chief engineer now in charge of a large power, light, ice and refrigerating plant, desires change of position. 18 years' experience, technical education, fully familiar with compound condensing engines, D. C. and A. C. 3-phase generators and refrigerating machinery. Address BOX 395, care Western Electrician, 510 Marquette Bldg., Chicago.

MACHINERY FOR SALE BY THE CITY OF ELY, MINNESOTA.

1—Steal Smokestack, height 80 ft., diameter 4 ft.

2—16 ft. x 60 in. Ducey Boilers, 46-4 in. tubes.

1 Buckeye automatic cut-off high speed Engine, size 15x16 in., 68 in. fly-wheel, 21 in. face.

1—Erie Ball automatic cut-off high speed Engine, size 12x13 in., 54 in. fly-wheel, 13 in. face.

1—Erie Ball automatic cut-off high speed Engine, size 9x12 in., 54 in. fly-wheel, 13 in. face.

1—General Electric Co. 120 K. W. Alt. Current Generator, 1,040 to 1,150 volts, 16,000 alt., ring oilers, sliding base.

2—Westinghouse, 60 K.W. Alt. Current Generators, 1,040 to 1,150 volts, 16,000 alt., ring oilers, sliding base.

These three machines are equipped with Exciters mounted on sliding bases; marble switchboard, size 9x6 ft., mounted with 3 three-way knife switches; 3 Exciter Switches; 6 Rheostats; 3 Volt-meters; 3 Ampere Meters; 3 Pilot Transformers; 1 eight-point Ground Detector and 3 sets of Wurts Lightning Arresters.

1—35 Light Brush Series Arc Machine with Regulator, Ampere Meter and 25 9.9 Series Open Arc Lamps.

1—Endless Leather Belt—30 feet long—double, two-ply, 16 inches wide.

1—Endless Leather Dynamo Belt 28 feet long, double, 12 inches wide, two-ply, good as new.

1—Endless Leather Dynamo Belt 20 feet long, double, 12 inches wide, two-ply, good as new.

1—Boiler Breeching for three boilers, breeching is 60 feet long with elbow in center, size of breeching 3 feet by 6 feet.

This machinery is all in running order and can be seen at the old light and water plant at Ely, Minn.

The city has also for sale one Hutson Chemical Engine, manufactured by the Marinette Iron Works, at Chicago, Ill. Same may be seen at the City Fire Hall.

Any information desired will be furnished by the undersigned.

L. J. WHITE, City Clerk.

Engineering TAUGHT BY CORRESPONDENCE
Our system of training by mail has helped thousands held down in poor positions to rise to better salaries and situations. Your chance to rise is just as good as others. Write for our free illustrated book, "Can I Become An Electrical Engineer?" We teach by mail, Electrical Engineering, Mechanical Engineering, Steam Engineering, Mechanical Drawing, Electric Lighting, Electric Railways. ELECTRICAL ENGINEER INSTITUTE, Dept. K 240 West 23rd St., New York.

A PRACTICAL BOOK
FOR PRACTICAL MEN
"MODERN WIRING DIAGRAMS AND DESCRIPTIONS FOR ELECTRICAL WORKERS."
By Henry C. Horstmann and Victor H. Tousley. 160 pages, over 200 illustrations. Full leather binding, red edges. Pocket size 4 x 6. Price, net, $1.50.
A work that not only tells you how to do it, but shows you.
THIS BOOK tells how to wire for call and alarm bells. For burglar and fire alarm. How to run bells from dynamo current. How to install and manage batteries. How to test batteries. How to test circuits. How to wire for annunciators; for telegraph and gas lighting. It tells how to locate "trouble" and "ring out" circuits. It tells about meters and transformers. It contains 30 diagrams of electric lighting circuits alone. It explains dynamos and motors; alternating and direct current. It gives 10 diagrams of ground detectors alone. It gives "Compensator" and Storage Battery installation. It gives simple and explicit explanations of the "Wheatstone Bridge" and its uses as well as volt-meter and other testing. It gives a new and simple wiring table, covering all voltages and all losses or distances, etc., etc.

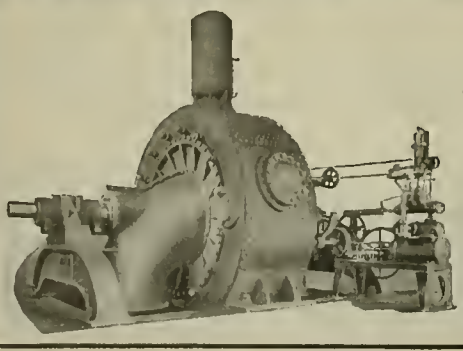
SPEER HIGH GRADE CARBON BRUSHES

MOTOR AND GENERATOR CARBON BRUSHES

SPEER CARBON CO., - St. Marys, Pa.



SAMSON TURBINE

The illustration shows the large NIAGARA design, HORIZONTAL SHAFT TURBINES recently installed by us for the TELLURIDE POWER TRANSMISSION CO., power station, Logan, Utah. Tests conducted by competent engineers developed as follows:

Head	Gateage	Speed	H-P	Generator Efficiency	Turbine Efficiency
211.5 ft.	1-2	400 r. p. m.	1038	.952 per cent	.738 per cent
209.7 "	3-4	400 " "	1560	.965 " "	.8359 " "
208.9 "	Full	406 " "	1677	.967 " "	.8057 " "

These results have never been equaled by any turbine of the Horizontal Shaft Design, operating under equally HIGH HEADS. The test was made **AFTER TURBINES WERE INSTALLED,** direct coupled to Generators. Francis' weirs and formulæ for discharge were used The original test reports on file at our offices. These turbines are all fitted with our SAMSON BALANCED GATES. Note especially the UNIFORM SPEED at ALL GATEAGES.

TELEPHONE
PRINCIPLES AND PRACTICE
A NEW BOOK IN TELEPHONY
By
GEORGE WALKER WILDER, PH. D.
Professor in Telephony in the Armour Institute of Technology

Complete and up-to-date, written by a practical man. All about modern telephone apparatus, their principles and use:

I. Fundamental Ideas
II. Telephone Apparatus
III. Systems of Communication
IV. Construction and Equipment

IN 32 CHAPTERS, 450 PAGES, 375 ILLUSTRATIONS. PRICE $2.00 POSTPAID.

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

Westinghouse
Arc Lighting System

Train Shed of the St. Louis Union Station, Lighted by Westinghouse Arc Lamps.

The efficient illumination of the enormous train shed and adjoining yards of the St. Louis Union Station, in preparation for the World's Fair traffic, was an important question.—After the keenest competition the following equipment was decided upon.

For the Train Shed and Express Buildings

550 Westinghouse A. C. Multiple Arc Lamps

For the Yards

600 Westinghouse A. C. Series Arc Lamps

Westinghouse Electric & Mfg. Co.

Pittsburg, Pa.

FORT WAYNE ELECTRIC WORKS

Form C enclosed arc lamps are first made durable—then efficient

The solid sheet copper case, cast-iron gas cap and suspension hood joined by the central brass carbon tube form a combination that endures the stress of long and severe service. There are no penny-wise-pound-foolish economies shown in these lamps.

The edgewise contact feeding the carbon, the pivot supported mechanism, balanced flotation of armature, globe protecting gas cap and holders are but a few of the elements in the various lamps that raise their efficiency above the average.

We build Form C arc lamps for any commercial circuit and in several special types for special lighting systems of our own. All worth investigating.

5000 horsepower Allis-Chalmers Engine
and 3,500 K. W., Bullock Generator
Machinery Hall, World's Fair, St. Louis.

WHAT IT HAS DONE

Began unloading from train Jan. 15th—27 carloads—Generator 10 carloads.
Set first turned on April 2nd, Engine and Generator operated perfectly ever since.
St. Louis Exposition officially opened April 30th, 1904.

Preparatory testing of Exposition Buildings and Grounds first turned on evening April 20th, this Engine and Generator carrying the load.

Ran non-condensing one month while Exposition was getting its condenser plant erected and connections made. During that time carried 4800 horsepower night after night.

Steam test required to operate the Cascade.—2000 horsepower.

Exposition having finished its condenser plant, the Engine was required to take full load June 10th. That night the load reached 5175 horsepower. Began with 26 inch vacuum, no load, which, under load, ran low to about 14 inches, for 7 to 8 hours. Engine has never been out of commission, except for two nights when a valve broke and pulled the wheel off.

Since then Engine ran condensing until July 25th.—carrying 5175 horsepower with from 13 to 16 inches vacuum. On July 25th a break occurred in the Exposition's discharge pipe which takes the condenser water to the Lagoon. The Engine then ran non-condensing for two nights. It carried 4800 horsepower during that time. On July 28 ran condensing, since then it has regularly carried 4500 horsepower with an average of 12 inches vacuum.

C & H Field Regulator

The best, the simplest and the most durable field regulator on the market.

WHY ?

Has no enamel to crack; will not ground; white hot wire tests have proven worth of resistance material; will carry overloads safely; no small parts to get out of order; no loose contacts to bother with; made of best material throughout; easily controlled; will not stick, nor will jar of machinery deviate lever.

Porcelain Angle Sockets

Designed especially for show window work, and may be used in open or concealed wiring.

PASS & SEYMOUR, Inc.

SOLVAY, N. Y.

NEW YORK CHICAGO SAN FRANCISCO

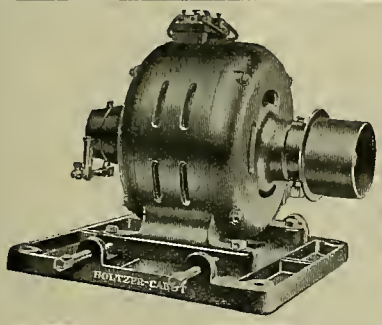
Pittsburg Transformers

Are not a source of expense as they do not burn out under normal conditions and will, when operated in oil, carry over-loads of 25 per cent. for periods of three or four hours without a temperature rise entirely within safe limits.

WE CARRY A STOCK IN CHICAGO.

Central Electric Company, *GENERAL SALES AGENTS,* 264-266-268-270 FIFTH AVENUE, CHICAGO.

Do You Know It?



WHAT!

¶ That we make single phase alternating current motors from 1-8 to 2 H. P.

¶ **Are they good and what is the price?**

¶ Well, just send for Bulletin 0304. It tells all about it.

you not only advertise your own business but promote their use among shop keepers, thus getting new users of current

LASTS A LIFETIME. ONE INCANDESCENT GLOBE OPERATES IT WITHOUT FURTHER ATTENTION.

DESCRIPTION

Before an artfully constructed large concave mirror-reflector a beautiful globe covered with magnificent stones in different colors is supported on chains by a fan-wheel, which runs with its steel point in a jewel knob. The light has its place in the center of the globe, wonderfully glittering and shining through the colored stones and the skillfully placed openings in the metal parts of the globe. The heat from the electric bulb light brings the fan-wheel into rotation and the globe revolves around the light. The whole mirror-screen is covered with the reflecting of the bright stones, always changing colors.

The whole effect is one of such unspeakable beauty that no picture is able to give a description of it; the colors move like in a kaleidoscope, but have such a splendor that every comparison is displaced.

ANNUAL FALL TRADE NUMBER

In view of present trade conditions *The Western Electrician's Annual Fall Trade Number,* which will be dated October 1st, will prove of more than ordinary interest. It will be a most excellent issue for advertisers. A large, special announcement, attractively arranged, will prove beneficial to your business.

This number will go to press Wednesday, September 28th.

WESTERN ELECTRICIAN 510 MARQUETTE BUILDING CHICAGO

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
TRADE MARK

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

How is this for an argument?

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

These, our little "SHOW WINDOWS," coming out even as they do every week, can't give you an adequate idea of ALL the goods we manufacture—

BUT OUR CATALOGUE CAN.

You've Heard of the
PEERLESS
WESCO

INCANDESCENT LAMPS

If you don't know them you are missing a great light giving bulb of incandescence that is electrically and mechanically perfect and rightly named "Peerless."

They are not labeled one way and rated another. Rest assured when you are buying "Peerless" lamps you are getting full rated candlepower.

The Wesco guarantee stands behind every "Peerless" lamp for efficiency, sustained candlepower, current-consumption and life.

On yearly contracts we are prepared to make the lowest price that has ever been made on a strictly high grade lamp.

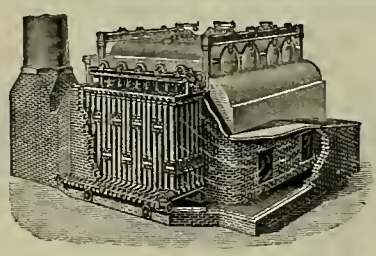
If the Installation of a

GREEN'S ECONOMIZER



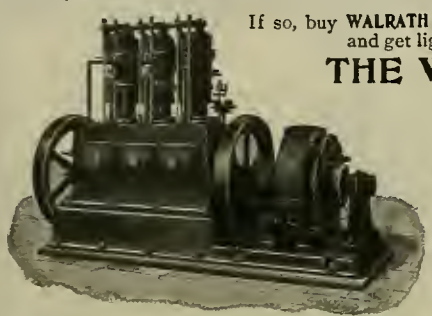
Were long an expense, then you would be justified in deliberating, but under ordinary conditions, depending largely upon coal cost, it soon pays for itself by utilizing waste gases. **Electric light and power plants** find it a paying investment outside of the 10 to 20% saving on coal bill. Ask for explanation through our experts, also for booklet, both free.

The **Green Fuel Economizer Co.**

Matteawan, N. Y. *Sole Manufacturers in the U. S.*

ARE YOU LOOKING FOR MONEY?

If so, buy **WALRATH GAS OR GASOLINE ENGINES** and get light on the subject.



THE WALRATH

Received the Highest Award at the Pan-American Exposition.

It will produce as good a commercial light as that of an automatic steam engine, either belted or direct-connected generator. Simple, Economical and Reliable

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

WESTON Electrical Instrument Co.,
Waverly Park, NEWARK, N. J.

Illuminated Dial Station Instruments.
These instruments are constructed upon the same general principle as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.
BERLIN—European Weston Electrical Instrument Co., Ritterstrasse No. 85.

Weston Standard Illuminated Dial Station Ammeter, Style B. "Flush Type."

Weston Standard
Portable Direct Reading Voltmeters and Millivoltmeters. Ammeters and Milammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.
Our portable instruments are recognized as standards throughout the civilized world.
Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.
They are the most reliable, absolute standards for Laboratory use.
LONDON—Elliott Bros., Century Works, Lewisham.

PARIS, FRANCE—E. B. Cadiot, 12 Rue St. Georges. New York Office—74 Cortlandt St.

SATISFACTION ASSURED

Allen-Bradley Electric Crane Controllers

Patented

Front View—before starting

Rear View

Front View—all resistance out

Manufactured by AMERICAN ELECTRIC FUSE CO., Chicago

A New Controller. Positively No Sparking. No Repairs. Guaranteed for One Year. Three Months' Free Trial. Perfect Control.

OUR GUARANTEE: Ask any Other Manufacturer to Duplicate It.

THE AMERICAN ELECTRIC FUSE COMPANY hereby guarantees to..... that it will at any time within three months from this date upon demand repay to said..... the sum of..... .....Dollars, being the full purchase price paid (or agreed to be paid) by said..... to the American Electric Fuse Company for one..... horsepower Allen-Bradley Crane Controller, number.....upon delivery within three months after this date of said controller, freight prepaid and in good condition, ordinary wear and tear from use excepted, at the office of the American Electric Fuse Company, Chicago, Illinois, together with a written statement that said controller has proved unsatisfactory to said .....

FURTHERMORE, the said American Electric Fuse Company agrees that it will at any time within one year from this date replace, without charge, any part of said controller which may prove defective or wear out during the ordinary use of said controller, provided that it is a condition of this guarantee that said..... ..... hereby agrees to use ordinary care in the operation of said controller, and that said controller will be operated by some person, or persons, familiar with the use of crane controllers, and further that said controller will not be wilfully or maliciously injured while in the possession of said.....

G. I. G. I.

Dust and Watertight Floor Outlet Box.

FIREPROOF MAGAZINE, April, 1904, writes as follows, viz:

"Several schemes have been brought forward at various times to provide an absolutely waterproof Outlet Box. The G. I. Dust and Waterproof Outlet Box seems to have solved this problem in a practical manner."

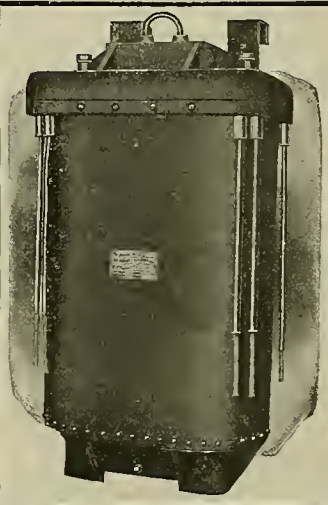
Northern Electrical Mfg. Co.

Engineers Manufacturers Madison, Wis., U. S. A.



HORNBERGER-IRWIN Transformers

(LARGE AND SMALL)

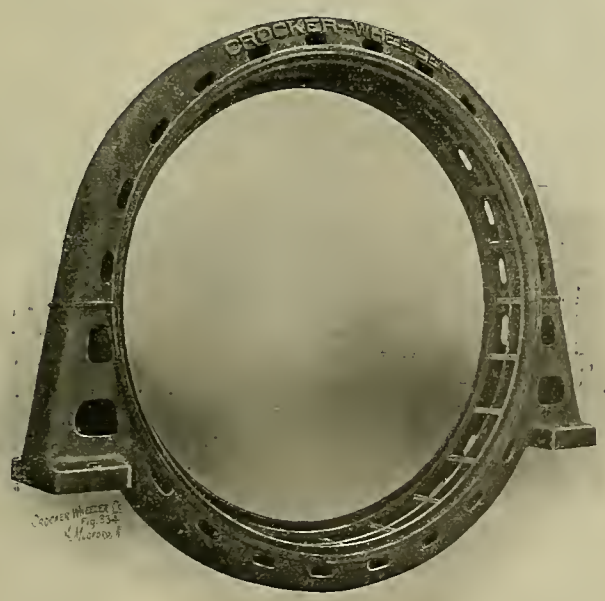
½ K. W. to 500 K. W.

This transformer represents the latest improvements in transformer coostruction; made in three types; multi-coil construction; ventilated cores; built for all commercial voltages and frequencies; **higher efficiencies together with lower temperatures than have heretofore been attained are guaranteed.** Catalogue just issued explains details.

Manufactured by

Crawfordsville Electric Co.

CRAWFORDSVILLE, INDIANA, U. S. A.



200 K. W. Stator Frame.

Alternators

Revolving Field Type
Any Standard Frequency
Single or Multiphase Winding

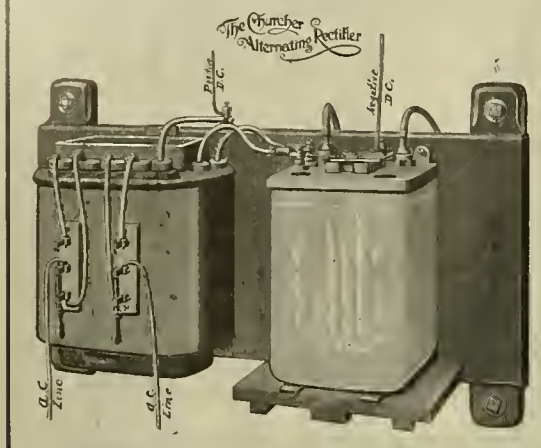
The same excellence for which our D. C. apparatus is known characterizes our work in the alternating field.

We have secured the American rights to the designs and patents of the celebrated Swiss firm of Brown, Boveri & Cie., who will act as consulting engineers for us.

Crocker-Wheeler Company

AMPERE, N. J.

Branch Offices in Sixteen Principal Cities.



CHURCHER ALTERNATING CURRENT RECTIFIERS

Transform any cycle of alternating current into direct current and will at the same time, if desired, convert the potential of the direct current produced to a higher or lower voltage.

SOLD ON 30 DAYS' APPROVAL.

Guaranteed to be cheaper to install, have lower maintenance cost and higher efficiency than a motor-generator.

Send for Bulletin No. 11.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

Diam. of body, 6 in., of base flange 7½ in.

THE
"I. P." (ISOLATED PLANT) TYPE
DIRECT-CURRENT
INSTRUMENTS

Are winners. Scales are eqnally divided, indications are dead beat, high range ammeters have separate shunts and the cases are of heavy polished brass.

Prices are right, the list figure for the meter illustrated, for instance, being $16.50.

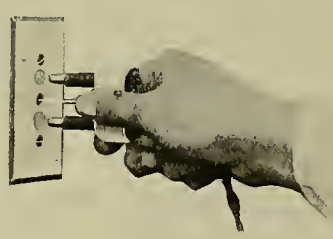
"DIAMOND H"

This Trademark on a Switch means "Perfection."



Automatic Flush Receptacles and Plugs

Are always used with "DIAMOND H" Switches to complete the best Electrical Installations.
We also make a complete line of Steel Wall Appliances.
Catalogue "B" on request.
Are easy to operate and make an absolutely perfect contact.
No screwdriver is necessary to open the lid, as it is opened automatically by inserting the plug.
Be sure to order "DIAMOND H" and get the best.

EDWARDS & CO.'S Specialties

Our Watchman's Time Detector Reduces Insurance.

No. 98.

Battery or Magneto System

Approved by the National Board of Fire Underwriters

Records exact time of watchman's visits, causing regular inspections. Circuit is automatically broken as soon as record is made. Handsomely finished. Furnished with or without time piece.

BETTER SATISFY

BOTH YOUR CUSTOMER AND YOURSELF THAN EITHER ONE.

Better look up the EDWARDS specialties when figuring on a contract, because they are bound to give a great deal more satisfaction than a great many devices of other makes.

The EDWARDS goods are thoroughly well made by competent workmen under careful supervision. The ideas embodied in the EDWARDS specialties are original with us, are money-makers because of their good points; save labor in installing and worry after they are put in.

The Lüngen Door Switch.

Specially made for telephone booths, bank vaults and other places where light is needed intermittently; made in two styles so that light is turned on or off as the door is closed according to the wish of the user. Each movement of the door reverses the operation of the switch automatically.

Wires can be connected after the switch is in place; absolutely reliable electrically and perfect mechanically.

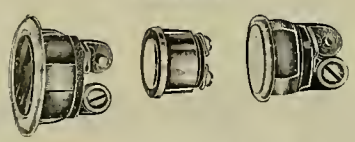
The only switch approved by the National Board of Fire Underwriters.

The Eco Door Switch, operates the light "Every other time."

ELECTRO MECHANICAL GONG.

Rings 375 times for each winding. Very powerful mechanism, strongly made, encased in iron, absolutely waterproof. Made for continuous ringing or single stroke, as desired.

PUSHES.



The Midget push fits a ⅞-inch hole; the Midget, Jr., a ⅝ inch hole and the New Mite a ½-inch hole. This last is the smallest push made. It is only different from the others in its size.

The binding posts of any of these pushes take any size of wire. The centers may be of light or dark pearl, or of a black, white, red or blue composition.

R. E.-A. L. MONITOR BELL.

All the mechanism is inside the gong and cannot be tampered with.

It Will Not Get Out of Order through operation, because there are no screws or nuts used in its adjustment. The hammer rod is thrown straight in and out by the armature, doing away with the weak points of the ordinary bell—the pivot. The sound is a full, clear, rich tone. hammer concealed preventing interference.

Induction Motors

The Stanley Electric Manufacturing Company's Induction Motors are well proportioned, electrically and mechanically.

The efficiencies and power factors are high.

The mechanical strength is great.

The construction is careful and accurate.

As in the Inductor Alternator, special attention has been given to the bearings.

The bearing construction permits of floor, wall or ceiling suspension, without special devices.

The frame is provided with ventilation holes and air is circulated throughout the motor, especially in and around the heated parts, thus keeping down the average temperature as well as the maximum.

Send for Bulletin No. 136

STANLEY INSTRUMENT CO.
GREAT BARRINGTON, MASS.

BOSSERT

Steel Drawn WALL Boxes

are indestructible and economical. They have holes closed with hermetically sealed plugs that can be knocked out with a hammer, producing a clean hole every time without the use of a file. Figure up the cost of breakage and the time used in making clean holes in cast iron boxes. Then decide to save this unnecessary expense by using drawn steel boxes. We own the patents and are the sole manufacturers of drawn steel boxes and

Drawn Steel Bushings

The fact that they are made of steel makes them very smooth, but in addition they are finished with enameled insulation, making them smoother than it is possible to make cast iron bushings. They assure absolute protection to wires drawn over conduit ends, and cannot be broken.

Bossert Knife Switches

are made with multiple blades to each pole. Thus the radiating surface is increased and the tendency to heat lessened. Blades are provided with adjustable bolts for taking up wear. Current carrying parts are of pure drawn copper—no cast metal being used.

WE ALSO MAKE

Panel Boards

Carrying a large variety in stock

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Debbs. 106 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 352 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on the subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Debbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 168 illustrations. Price $1.25.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association Cloth bound; fully illustrated. Price, $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. 136 pp.; illustrated. Price $1.00.

The Above, or Any Other Electrical Work Published, Sent on Receipt of Price.

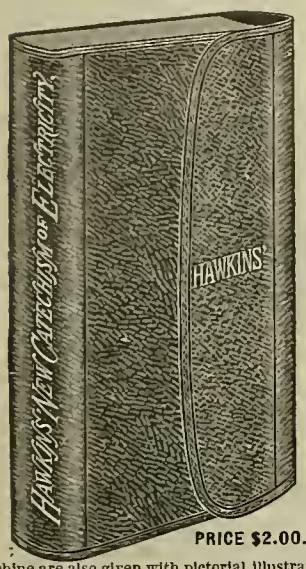
SPEER CARBON CO., - St. Marys, Pa.

HAWKINS' NEW CATECHISM OF ELECTRICITY.

Plan of the Work, Contents, Etc.



PRICE $2.00.

The New Catechism of Electricity will be found to be surprisingly plain, and free from useless and ambiguous terms. The plan upon which it is arranged is unique.

The book is, first of all, intended to be plain and instructive; some 300 illustrations have been introduced, so that the mere pictures will afford almost a knowledge of the subjects.

It is a school book from the manner in which it proceeds from the simple facts to the abstract principles which the facts indicate; it is also a book of reference through the index of seventeen double columns of fine type pages; by means of this index a thousand items of practical importance are at once available.

It is an up-to-date work, which has cost a large outlay of capital and time, and, in short, it is doubtful if any more attractive book has ever been issued—or one more useful.

The subjects treated upon are as follows: Dedication to Thomas A. Edison, with engraving of Mr. Edison; Preface and Introduction; Nature and Source of Electricity and Magnetism.

The Dynamo; Conductors and Non-Conductors; Symbols, abbreviations and definitions relating to electricity; Parts of the Dynamo; The Motor; The Care and Management of the Dynamo and Motor.

Electric Lighting; Wiring; The rules and requirements of the National Board of Underwriters in full; Electrical Measurements.

The Electric Railway; Line Work; Instruction and Cautions for Linemen and the Dynamo Room; Storage Batteries; Care and Management of the Street Car Motor; Electro Plating.

The Telephone and Telegraph; The Electric Elevator; Accidents and Emergencies, etc., etc.

The full one-third part of the whole work has been devoted to the explanation and illustrations of the dynamo, and particular directions relating to its care and management;—all the directions are given in the simplest and most kindly way to assist rather than confuse the learner. The names of the various parts of the machine are also given with pictorial illustrations of the same.

In the Catechism no less than 25 full page illustrations have been given of the various dynamo machines made in different parts of the country, and an equal number of part page illustrations.

NEW TYPES

Hartford Automatic Time Switches

In addition to our Standard Switch we have brought out the following types:

Type "C" automatically cuts out the switch operation Sunday, or any other day desired.

Type "D" is arranged to throw on the switch for two periods each day. This type is particularly desirable for attracting the attention of theater crowds before and after performances, saving current between times.

All switches are equipped with Seth Thomas 8-Day Movements, and require only weekly winding.

We are glad to consider the construction of Automatic Time Switches for special purposes.

Send for Catalogue.

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost.

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

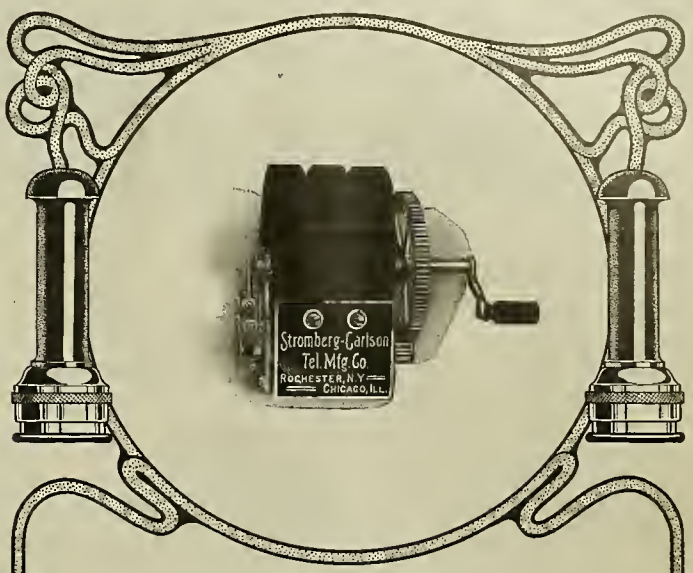
CHICAGO, U. S. A.



Standard three-bar generator, same as used in our series telephones. We have manufactured generators since we first started in business. What this experience means to you enables us to sell the best generator made at a price slightly above the ordinary. The difference is caused by the better grade of material used and the superior workmanship.

You pay nothing for our experience. Our Bulletin No. 11-E explains fully this apparatus. Mailed free.

WOOD LIGHTING & POWER SYSTEMS
Fort Wayne, Ind.

Type A transformers combine perfection in insulation with economy of operation to the highest degree and have shown by published data that they are as good as the best. The shell type construction is, in the Type A, developed to its highest efficiency. In close regulation on unbalanced three-wire systems or on inductive loads, as well as on average loads, Type A transformers satisfy the most exacting demands of their users. Lighting circuits of various ratios and all commercial voltages with lighting or power loads from 0.6 to 60 kw. can be supplied by a Standard A

Good Advice

No. 10

Direct Current Wattmeters are like watches in that some are good, some bad; some run fast, some slow; some are cheap, some more expensive, and some have a reputation in name only. Don't be misled into buying a cheap chronometer or cheap wattmeter, as both are sure to stop when you need them most. The person who wants an accurate watch must pay the price, and whoever wants a meter that is accurate on all loads all the time must buy a Duncan.

"The Big Reliable"

5000 horsepower Allis-Chalmers Engine and Bullock Generator

Supplying Current for the

Famous Decorative Lighting

of the

WORLD'S FAIR, ST. LOUIS

attracting more attention and causing more favorable comment
than any other power unit in the world

Designed 1903 Shipped from our Works January 1904—37 Carloads

RECORD

First Operated April 20th, 1904

Ran non-condensing several weeks while Exposition Authorities were making their condenser connections. During that time carried 4900 horsepower night after night

When other plants were out of commission, operated the Cascades—2000 horsepower—and supplied St. Louis Transit Co. with 3000 horsepower

Ever since Exposition Authorities finished their condenser connections the "Big Reliable" has carried 6500 horsepower night after night, running cool and steady, with only 12 inches vacuum in exhaust pipe at engine

Always ready; frequently called upon for extra service in emergencies; has never failed; has not cost a cent for repairs

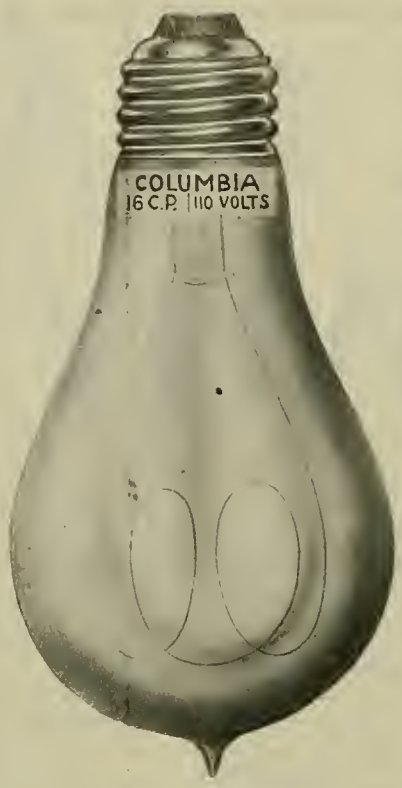
ABOUT THAT TIP

(MEASUREMENT)



AND A FEW OTHER MINOR POINTS

ON "COLUMBIA" LAMPS

Send for our Booklet, a Wallet Full of Wisdom.

AS MUCH LIGHT HORIZONTALLY as any other lamp.

10% MORE LIGHT THAN any OTHER LAMP BELOW the HORIZONTAL.

40% MORE LIGHT AT TIP than any oval anchor lamp.

NO increase of current consumption per lamp to get this in the Columbia.

Send for our Catalogue of Crystal Lamps (Meridian Type).

Columbia Lamps are manufactured under a License to use the Chemical Exhaust Process of exhau ting lamps. This process is vitally necessary in the production of the highest quality of lamp. Every package of Columbia Lamps carries a label reading.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

HIGHEST GRADE NUERNBERG CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost.

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

American Conduit Co.

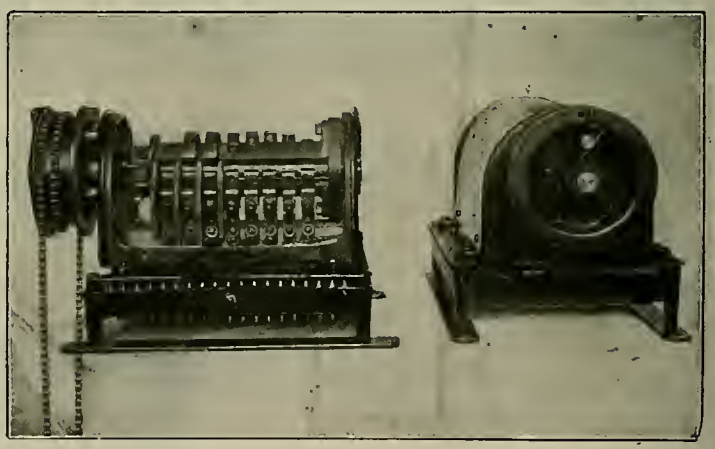
Other Offices:
170 Broadway, New York. 336 Macy St., Los Angeles

Rope-Operated, Reversible Drum Controller.



The ideal controller for small cranes and hoists where it is desired to operate from the floor.

Built to stand the most severe usage. Automatic return to "off" position when operator releases chain or rope.

Brushes and contacts are renewable and are made of hard drawn copper.

SPEED—Normal at full load to 50 per cent. at half load. Specially built for reduction of 90 per cent. regardless of load.

You've Heard of the
PEERLESS
INCANDESCENT LAMPS

If you don't know them you are missing a great light giving bulb of incandescence that is electrically and mechanically perfect and rightly named "Peerless."

They are not labeled one way and rated another. Rest assured when you are buying "Peerless" lamps you are getting full rated candlepower.

The Wesco guarantee stands behind every "Peerless" lamp for efficiency, sustained candlepower, current-consumption and life.

On yearly contracts we are prepared to make the lowest price that has ever been made on a strictly high grade lamp.

Faster Time to St. Louis:

The Wabash Cuts the Schedule to 7 Hours.

Commencing Sunday, October 2nd, the Wabash banner Blue Limited, which leaves Chicago at 11:03 A. M. daily, will make the run from Chicago to St. Louis in seven hours—one hour faster time than has heretofore ever been made between Chicago and St. Louis. On the return trip this train leave St. Louis at 2:00 P. M. and reaches Chicago at 9:00 P. M.

The Banner Blue Limited is the finest day train in the world. The equipment, which is all new, consists of highback coaches, free reclining chair cars, dining car and parlor observation car.

WORKS QUICK AND EASY. KEEPS ITS LUSTER. HOLDS OLD TRADE AND MAKES NEW. DOES NOT DETERIORATE. ESTABLISHED 16 YEARS. SOLD BY AGENTS AND DEALERS ALL OVER THE WORLD.

202 Custom House Place, Chicago

100 SUBSCRIBERS of the Citizens' Telephone Company of Grand Rapids, Michigan, were selected at random by a disinterested party and asked how they liked that company's Automatic Telephone Service in comparison with the manual service, which it replaced.

95 OF THEM said it was so perfect that there could be no comparison, they greatly preferred it;

4 OF THEM said they "didn't care which they had;"

1 OF THEM preferred the manual service.

The above percentages indicate the attitude of 6,000 subscribers to Automatic Telephone Service in Grand Rapids.

MR. TELEPHONE MANAGER, if you are trying to satisfy the public and give your patrons the sort of service they appreciate most you will take the hint that this conveys and give them Automatic Service.

AUTOMATIC ELECTRIC CO., Van Buren and Morgan Sts. CHICAGO, U. S. A.

Standard three-bar generator, same as used in our series telephones. We have manufactured generators since we first started in business. What this experience means to you enables us to sell the best generator made at a price slightly above the ordinary. The difference is caused by the better grade of material used and the superior workmanship.

You pay nothing for our experience. Our Bulletin No. 11-E explains fully this apparatus. Mailed free.

Good Advice

No. 11.

Don't be biased against a meter if you don't know anything about it. If the maker claims it to be the best on the market in every particular, give him the benefit of the doubt. If you haven't tried the Standard Direct Current Wattmeter of America, do so, it's the DUNCAN.

Good Advice No. 12 Next Week.

Send for Bulletin and Prices.

"The Big Reliable"

5000 horsepower Allis-Chalmers Engine and Bullock Generator

Supplying Current for the

Famous Decorative Lighting

of the

WORLD'S FAIR, ST. LOUIS

attracting more attention and causing more favorable comment
than any other power unit in the world

Designed 1903 Shipped from our Works January 1904—37 Carloads

RECORD

First Operated April 20th, 1904

Ran non-condensing several weeks while Exposition Authorities were making their condenser connections. During that time carried 4900 horsepower night after night

When other plants were out of commission, operated the Cascades—2000 horsepower—and supplied St. Louis Transit Co. with 3000 horsepower

Ever since Exposition Authorities finished their condenser connections the "Big Reliable" has carried 6500 horsepower night after night, running cool and steady, with only 12 inches vacuum in exhaust pipe at engine

Always ready; frequently called upon for extra service in emergencies; has never failed; has not cost a cent for repairs

If you want Wires or Cables insulated with the HIGHEST CLASS INDIA RUBBER INSULATION you should buy . . . . . .

HABIRSHAW

Complete stock of all sizes constantly on hand and for sale at lowest market prices by

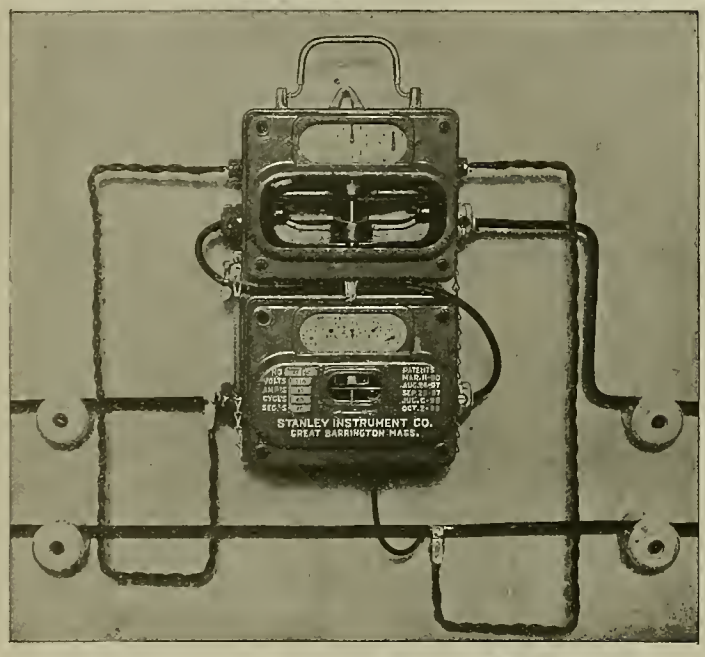
CHICAGO EDISON COMPANY,

WRITE FOR PRICES. 139 ADAMS STREET, CHICAGO.

Sterling Black Plastic Insulator.

One hundred days' continuous baking at 180° F. will not make it brittle. Water repellent. Oil proof.

THE STERLING VARNISH CO., - - Pittsburg, Pa.



TESTING WATTMETER

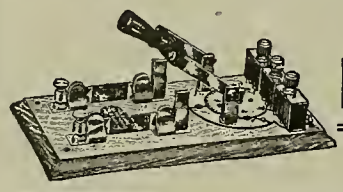
ACCURATE TESTS

in a few minutes, anywhere, by one man alone without regulation of VOLTAGE, LOAD OR FREQUENCY

STANLEY INSTRUMENT CO.

GREAT BARRINGTON, MASS.

SOMETHING DOING IN A STORM



WITHOUT A

King of Protectors

Better Buy a

"TORNQUIST"

COMBINATION LIGHTNING ARRESTER GROUND SWITCH FUSE AND LEVER CUT-OUT.

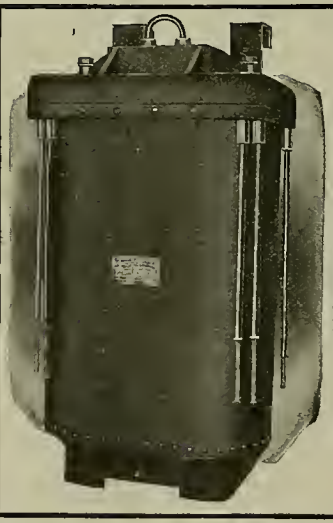
THE ONLY SAFE PROTECTOR MADE. ORDER SAMPLE NOW.

BABY KNIFE SWITCHES — STAMPING AND PLATING. — SOLD BY ALL JOBBERS.

Clinton Stamping & Electric Co.,

CLINTON, IA.

HART & CO., Chicago, General Agents.



HORNBERGER-IRWIN Transformers

(LARGE AND SMALL)

½ K. W. to 500 K. W.

This transformer represents the latest improvements in transformer construction; made in three types; multi-coil construction; ventilated cores; built for all commercial voltages and frequencies; **higher efficiencies together with lower temperatures than have heretofore been attained are guaranteed.**

Catalogue just issued explains details.

Manufactured by

Crawfordsville Electric Co.

CRAWFORDSVILLE, INDIANA, U. S. A.

There is No Higher-Class India-Rubber Insulation For Wires and Cables than

HABIRSHAW.

Authorized Manufacturers of the

ATTIX FLEXIBLE TUBE WIRE.

The India-Rubber and Gutta-Percha Insulating Co.,

MAIN OFFICE, Glenwood Works,

Southwestern Representative: **THE SACHS ELECTRIC CO., ST. LOUIS, MO.**

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

Our Compound Stops Sparking and Saves Commutators.

14 Years' Use on Street Ry., Light and Power Commutators Has Proven its Worth. WE GUARANTEE RESULTS.

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost.

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

A PERFECT APPARATUS.

Made in any desired capacity.
Sample parts and quotations on request.

INTERNATIONAL TELEPHONE MANUFACTURING CO.
CHICAGO, U. S. A.

Standard three-bar generator, same as used in our series telephones. We have manufactured generators since we first started in business. What this experience means to you enables us to sell the best generator made at a price slightly above the ordinary. The difference is caused by the better grade of material used and the superior workmanship.

You pay nothing for our experience. Our Bulletin No. 11-E explains fully this apparatus. Mailed free.

TELEPHONE PRINCIPLES AND PRACTICE

A NEW BOOK IN TELEPHONY

By
GEORGE WALKER WILDER, PH. D.
Professor in Telephony in the Armour Institute of Technology

Complete and up-to-date, written by a practical man. All about modern telephone apparatus, their principles and use:

I. Fundamental Ideas
II. Telephone Apparatus
III. Systems of Communication
IV. Construction and Equipment

IN 32 CHAPTERS, 450 PAGES, 375 ILLUSTRATIONS. PRICE $2.00 POSTPAID.

Send Postal Money Order to

THE CANTWELL PRESS - Madison, Wis.

100 SUBSCRIBERS of the Citizens' Telephone Company of Grand Rapids, Michigan, were selected at random by a disinterested party and asked how they liked that company's Automatic Telephone Service in comparison with the manual service, which it replaced.

95 OF THEM said it was so perfect that there could be no comparison, they greatly preferred it;

4 OF THEM said they "didn't care which they had;"

1 OF THEM preferred the manual service.

The above percentages indicate the attitude of 6,000 subscribers to Automatic Telephone Service in Grand Rapids.

MR. TELEPHONE MANAGER, if you are trying to satisfy the public and give your patrons the sort of service they appreciate most you will take the hint that this conveys and give them Automatic Service.

TO WORLD'S FAIR VISITORS

Certain other Chicago-St. Louis lines have advertised freely in Chicago and elsewhere that they land their passengers at the World's Fair Grounds. Up to a short time ago they were using the Rock Island road to reach the Fair Grounds. A recent order of the United States Court prohibits the Rock Island from handling the trains of other lines. The Wabash is, therefore, the only line that can handle World's Fair travel between Union Station, Page Ava. and the World's Fair Grounds. The Chicago-St. Louis lines referred to have applied for permission tn run their passengers over the Wabash tracks, which permission has been refused. They will be obliged to land their passengers at Union Station, which is over five miles from the World's Fair Grounds.

ALL WABASH TRAINS

to and from St. Louis, both regular and special, pass and stop at the World's Fair main entrance, where the Wabash has its own magnificent passenger station, with every facility for rapid handling of passengers and baggage.

Between Chicago and St. Louis the Wabash has

FOUR DAILY TRAINS

leaving Chicago at 8:45 a. m., 11:03 a. m., 9:17 p. m. and 11:30 p. m. The 11:03 a. m. train is the **Banner Blue Limited** "the latest and only finest day train on earth." This train makes the run from Chicago to St. Louis in seven hours, reducing the usual running time by one hour.

WORLD'S FAIR EXCURSION RATES

from Chicago are: For coach tickets (good only in coaches or free reclining chair cars), with return limit of seven days from date of sale, $6.00. These tickets are on sale every day except Friday and Saturday.

Ten-day tickets, good in coaches, chair cars and sleepers, $8.00. Sold only Oct. 12th, 16th and 17th.

Sixty-day tickets, good in coaches, chair cars or sleepers, $10.00. Sold every day.

Further information promptly furnished upon request.

Good Advice

No. 12

A station manager is penny wise and pound foolish who uses every precaution to prevent the theft of material from his plant, but allows meters on his lines that are robbing him blind, on account of their not registering all the energy passing through them. If he installs Duncan Direct Current Wattmeters on his circuits, then his losses are at an end with peace and profit as his reward.

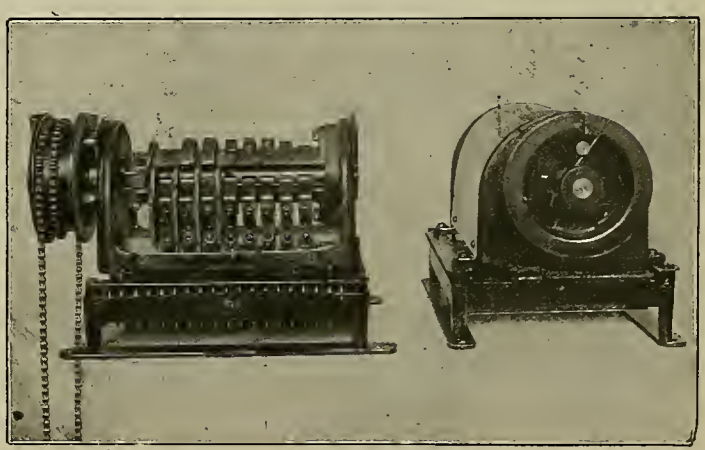
Rope-Operated, Reversible Drum Controller.



The ideal controller for small cranes and hoists where it is desired to operate from the floor.

Built to stand the most severe usage. Automatic return to "off" position when operator releases chain or rope.

Brushes and contacts are renewable and are made of hard drawn copper.

SPEED—Normal at full load to 50 per cent. at half load.
Specially built for reduction of 90 per cent. regardless of load.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
·TRADE MARK·

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

Allen-Bradley Electric Crane Controllers

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Combines the **good features** of other conduits.
Eliminates the **bad features** existing in many kinds.
Has valuable features not found in any other ducts.

Made in 7-foot lengths with male and female joints, making construction very rapid and simple, with consequent low cost.

Alignment is perfect and permanent without tedious care and skill required in laying of butt-joint conduits.

Users are astonished by the ease and rapidity with which cables can be drawn in, and this without the slightest scratching or injury to the lead covering thereof.

Made in sizes from 1-inch to 10-inch diameter.

Bends of any radius and any angle.

Write us for further information and prices, stating sizes and quantities required.

Standard three-bar generator, same as used in our series telephones. We have manufactured generators since we first started in business. What this experience means to you enables us to sell the best generator made at a price slightly above the ordinary. The difference is caused by the better grade of material used and the superior workmanship.

You pay nothing for our experience. Our Bulletin No. 11-E explains fully this apparatus. Mailed free.

---

100 SUBSCRIBERS of the Citizens' Telephone Company of Grand Rapids, Michigan, were selected at random by a disinterested party and asked how they liked that company's Automatic Telephone Service in comparison with the manual service, which it replaced.

95 OF THEM said it was so perfect that there could be no comparison, they greatly preferred it;

4 OF THEM said they "didn't care which they had;"

1 OF THEM preferred the manual service.

The above percentages indicate the attitude of 6,000 subscribers to Automatic Telephone Service in Grand Rapids.

MR. TELEPHONE MANAGER, if you are trying to satisfy the public and give your patrons the sort of service they appreciate most you will take the hint that this conveys and give them Automatic Service.

A PRACTICAL BOOK FOR PRACTICAL MEN

"MODERN WIRING DIAGRAMS AND DESCRIPTIONS FOR ELECTRICAL WORKERS."

By Henry C. Horstmann and Victor H. Tousley. 160 pages, over 200 illustrations. Full leather binding, red edges. Pocket size 4 x 6. Price, net, $1.50.

A work that not only tells you how to do it, but shows you.

THIS BOOK tells how to wire for call and alarm bells. For burglar and fire alarm. How to run bells from dynamo current. How to install and manage batteries. How to test batteries. How to test circuits. How to wire for enunciators; for telegraph and gas lighting. It tells how to locate "trouble" and "ring out" circuits. It tells about meters and transformers. It contains 30 diagrams of electric light circuits alone. It explains dynamos and motors; alternating and direct current. It gives 10 diagrams of ground detectors alone. It gives "Compensator" and Storage Battery installation. It gives simple and explicit explanations of the "Wheatstone Bridge" and its uses as well as volt-meter and other testing. It gives a new and simple wiring table, covering all voltages and all losses or distances, etc., etc.

Good Advice

No. 13.

Good wines improve with age, but not so with all Direct Current Wattmeters. The former is sometimes used as an antidote for the disappointing and discouraging behavior of the latter. We do not know it to be general that some meters are conducive to making the meterman form the acquaintance of John Barleycorn, but we do know it to be generally acknowledged that Duncan Meters, as part of a plant's equipment, keep it in a sober, healthy and money-making condition.

Good Advice No. 14 Next Week.

Send for Bulletin and Prices.

JAS. McLAUGHLIN & CO., ELECTRICAL ENGINEERS

586 Fulton Street, - - Chicago, Ill.

1 **1 Point for the Monitor Bushing** 1

is the fact that it is made with a perfectly rounded orifice, making this the 1 bushing that will not cut insulation on wires. 1 other point is its covering of insulating enamel—producing the smoothest and safest surface possible. 1 minute spent in investigating this bushing will prove profitable to any 1. Only 1 house in the U. S. has the right to manufacture them and that 1, the 1 which owns the patent.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
TRADE MARK

HIGHEST GRADE NUERNBERG

CARBONS

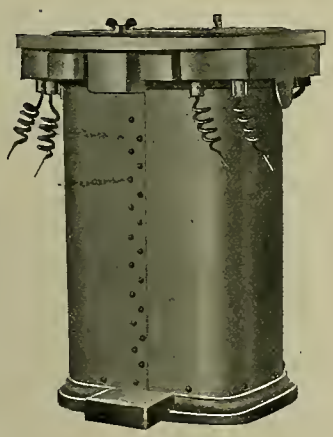
in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

1893——1904

STANDARD TRANSFORMERS
SERIES ARC TRANSFORMERS
POLYPHASE TRANSFORMERS



Before placing our 1905 type transformers on the market we offer the following standard type transformers subject to our regular 5 years' guarantee at a bargain.

1,000 or 2,000 volts primary and 100 or 200 volts secondary.

130	30	Light.	16	150	Light
60	40	"	18	200	"
40	50	"	24	300	"
36	60	"	17	400	"
28	80	"	8	500	"
56	100	"			

Quick shipments. If you want the latest and best write us about the 1905 type.

KUHLMAN ELECTRIC CO.,

ELKHART, IND., U. S. A.

TYPE K TRANSFORMER

A GOOD REPUTATION

Is a peculiar thing. In the first place it is hard to get and merit and time alone can get it. In the second place it is easy to lose. PITTSBURGH TRANSFORMERS have earned their reputation—earned it and kept it—which means a good deal nowadays.

CAN'T WE HAVE YOUR NEXT TRANSFORMER ORDER?

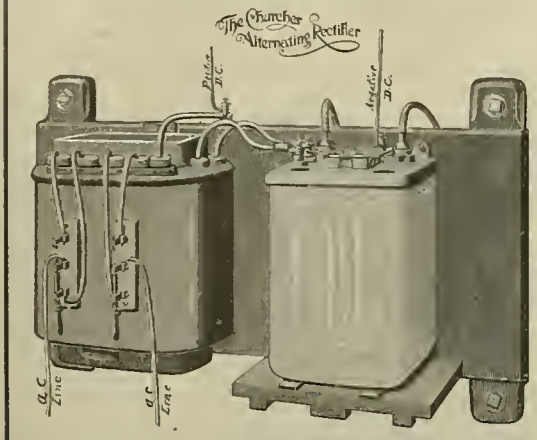
OKONITE IT NEVER DISAPPOINTS

Central Electric Company,

SALES AGENT

264-266-268-270 Fifth Ave., Chicago

OKONITE IT NEVER DISAPPOINTS



CHURCHER ALTERNATING CURRENT RECTIFIERS

Transform any cycle of alternating current into direct current and will at the same time, if desired, convert the potential of the direct current produced to a higher or lower voltage.

SOLD ON 30 DAYS' APPROVAL.

Guaranteed to be cheaper to install, have lower maintenance cost and higher efficiency than a motor-generator.

SALES OFFICES IN ALL LARGE CITIES

Never was lamp like the Zenith

More than an incandescent
Less than an arc
And more adaptable than either

The Packard Zenith lamp can be used where it is not practicable to use an arc lamp, and when used in place of a cluster of incandescents it gives better light at less cost.

Made in 25 and 55 C. P. and for all standard voltages. Do you want prices?

EDWARDS AND CO

The R. E.-A. L. Monitor Bell.
(Patented.)

Hammer rod supported in two places and thrown straight out and in by the armature, striking gong on inside, near edge, thus giving a full, clear tone.
All springs made of Phosphor Bronze and so formed that there is least possible strain.
Contacts are platinized, adjustment is made by pressure on the standard which supports one contact. No screws or nuts being used in the adjustment, bell does not get out of order by operation.
Ordinarily the weak point is the pivot, the unreliable one the adjusting screw and nut. As these defects have been eliminated, this bell will stand hard usage and operate under adverse conditions.
The hammer entirely concealed by gong and cannot be tampered with.
It is especially adapted for use on street cars, as in addition to the advantages mentioned, it is dust, insect and moisture proof.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated. Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conducters, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynames; Magnets; Field Cells; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current: How Produced; Induction; Series Wound Dynamos; Shunt Weund Dynames; Exciting the Fields; Constant Current and Constant Potential Dynames; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed: Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dyname; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulater and Meter; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicaters.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Reund Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compeund Wound Machines.—CHAPTER XXII: Switches and Switchheards; Loop Switch; Plug and Socket; Change Over Plug and Socket: Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Meters Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynames, Continued; The Mordey Alternator; Stationary Armatures. Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo: The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conducter; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers, Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, In Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomsen Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

FIBRE-GRAPHITE COMMUTATOR BRUSH — NOISELESS — SELF-LUBRICATING

There's No Friction
with the Fibre-Graphite Commutator Brush. Being 90 per cent. pure graphite, it insures low resistance, no sparking under a varying load, and longer wear. There is no greasing required. The Fibre-Graphite is therefore the most economic brush on the market. Send for price list.

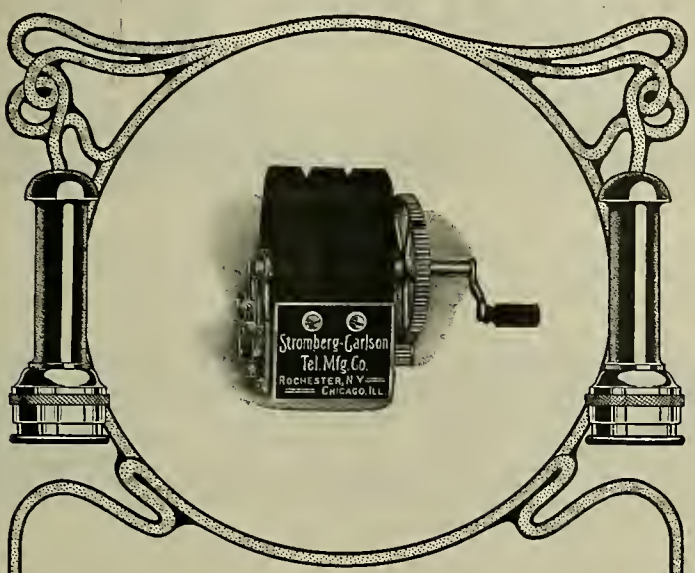
INTERNATIONAL TELEPHONE MANUFACTURING CO.

CHICAGO, U. S. A.



Standard three-bar generator, same as used in our series telephones. We have manufactured generators since we first started in business. What this experience means to you enables us to sell the best generator made at a price slightly above the ordinary. The difference is caused by the better grade of material used and the superior workmanship.

You pay nothing for our experience. Our Bulletin No. 11-E explains fully this apparatus. Mailed free.

A PRACTICAL BOOK FOR PRACTICAL MEN

"MODERN WIRING DIAGRAMS AND DESCRIPTIONS FOR ELECTRICAL WORKERS."

By Henry C. Horstmann and Victor H. Tousley. 160 pages, over 200 illustrations. Full leather binding, red edges. Pocket size 4 x 6. Price, net, $1 50.

A work that not only tells you how to do it, but shows you.

THIS BOOK tells how to wire for call and alarm bells. For burglar and fire alarm. How to run bells from dynamo current. How to install and manage batteries. How to test batteries. How to test circuits. How to wire for annunciators; for telegraph and gas lighting. It tells how to locate "trouble" and "ring out" circuits. It tells about meters and transformers. It contains 30 diagrams of electric lighting circuits alone. It explains dynamos and motors; alternating and direct current. It gives 10 diagrams of ground detectors alone. It gives "Compensator" and Storage Battery installation. It gives simple and explicit explanations of the "Wheatstone Bridge" and its uses as well as volt meter and other testing. It gives a new and simple wiring table, covering all volteges and all losses or distances, etc., etc.

RUNZEL-LENZ ELECTRIC MFG. CO.

97-101 S. CLINTON STREET — CHICAGO

100 SUBSCRIBERS of the Citizens' Telephone Company of Grand Rapids, Michigan, were selected at random by a disinterested party and asked how they liked that company's Automatic Telephone Service in comparison with the manual service, which it replaced.

95 OF THEM said it was so perfect that there could be no comparison, they greatly preferred it;

4 OF THEM said they "didn't care which they had;"

1 OF THEM preferred the manual service.

The above percentages indicate the attitude of 6,000 subscribers to Automatic Telephone Service in Grand Rapids.

MR. TELEPHONE MANAGER, if you are trying to satisfy the public and give your patrons the sort of service they appreciate most you will take the hint that this conveys and give them Automatic Service.

TYPIC AL OF INSURANCE
TYPE A INSULATION

Insulation implies insurance; in fact, nearly half of insurance lies in insulation.

Therefore, to insure against interruption of transformer service, it is necessary to secure insulation.

Type A insulation is close to perfection, with efficiency and regulation above the average of other transformers.

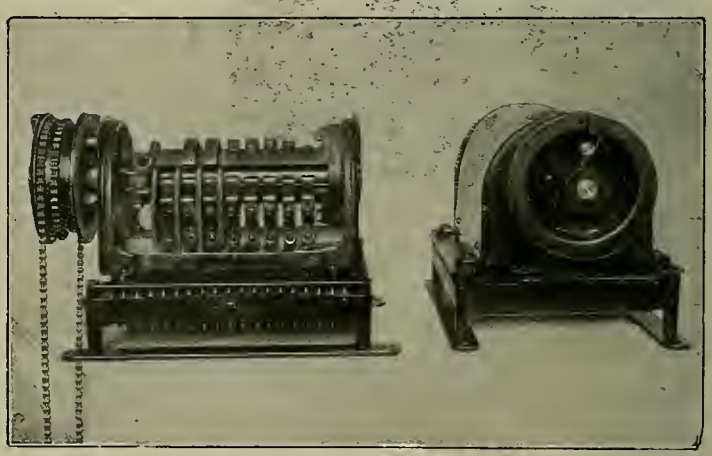
ASK YOUR SUPPLY DEALER FOR "NOARK"

H. W. JOHNS-MANVILLE CO.

100 William St., NEW YORK

New York, Milwaukee, Chicago, St. Louis, Boston, Philadelphia, Pittsburg, Cleveland, New Orleans, London, Paris, Brussels

Rope-Operated, Reversible Drum Controller.



The ideal controller for small cranes and hoists where it is desired to operate from the floor.

Built to stand the most severe usage. Automatic return to "off" position when operator releases chain or rope.

Brushes and contacts are renewable and are made of hard-drawn copper.

SPEED—Normal at full load to 50 per cent. at half load.
Specially built for reduction of 90 per cent. regardless of load.

MILWAUKEE, WIS.

New York Boston Chicago Pittsburg

THE B. O. TRANSFORMER

Do you expect to need new transformers this fall? If you do, the B. O. will interest you.

Low Losses
High Efficiencies
High Insulation
Low Price.

Are you familiar with oil duct transformers?
Send us your address and we will tell you about our insulation and the advantages of slab windings in connection with oil ducts.

"THE S. K. C. SYSTEM"

D. & W. BABY CARTRIDGE FUSE, spring clip contact.

D. & W. PANEL CARTRIDGE FUSE, screw clamp contact.

D. & W. PANEL FUSES

work equally well under all temperatures and changing atmospheric conditions. They are so reliable that underwriters do not require them to be enclosed in fireproof cabinets, thus making it possible to install a cheaper tablet than when using ordinary fuses. Our prices on D. & W. PANEL FUSES also are lower than those of other dealers.

WE SOLICIT YOUR ORDER AND WILL SHIP FROM CHICAGO STOCK.

ANCHORS

That are cheaper to install because of the simple method of burying and the great strain that can be applied—**American Bull-Tongue Anchors** reduce the cost of the process of guying a pole by reduction in labor, they **stay solid**, they do not slip—no take up required. 21 cents worth holds 8,713 pounds, 42 cents worth holds 10,521 pounds, other money's worth in proportion.

ST. LOUIS, MO., U. S. A.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

HIGHEST GRADE NUERNBERG CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

Allen-Bradley Electric Crane Controllers

Patented

Never was lamp like the Zenith

More than an incandescent
Less than an arc
And more adaptable than either

The Packard Zenith lamp can be used where it is not practicable to use an arc lamp, and when used in place of a cluster of incandescents it gives better light at less cost.

Made in 25 and 55 C. P. and for all standard voltages. Do you want prices?

PLANT OF THE UNITED STATES CARBON COMPANY including land, buildings, machinery, etc., situated on the Pennsylvania Railroad within the city limits of Cleveland, Ohio.

LAND—Vacant and covered by buildings about 2½ acres, bounded on two sides by streets and having a frontage of 348 ft. 4 in. on the Pennsylvania Railroad.

BUILDINGS—Main building is a two and one story brick building with gravel roof, the two-story part having a frontage of 191 ft. on Grand Ave., by about 50 ft. The one-story part having a frontage of 211 ft. on the switch from the Pennsylvania Railroad by about 55 ft. The shipping room is 40 ft. front on Grand Ave., by 110 ft. deep to a switch from the Pennsylvania Railroad and is a two-story brick building, with gravel roof; the second floor, however, only covers a space of 14 by 40 ft. in the front part of the building. See diagram of land and buildings above.

MACHINERY—Pulleys, shafting, belting and complete machinery for the manufacture of electric-light carbons and for furnishing power, heat and light for the plant. Capacity of plant about 50,000 carbons per day.

UNJUST BOYCOTT

The factory of HAMILTON CARHARTT, manufacturer of the Celebrated Carhartt Overall, is operated upon Union principles, absolutely and exclusively, and it is an outrageous injustice that he should be made to suffer, instead of being commended for the manly course he has pursued towards Organized Labor.—*Locomotive Firemen's Magazine, Indianapolis, Ind., July 1st.*

Common justice demands the statement that Hamilton Carhartt is conducting a Union establishment under Union conditions, placing the Union Label on his entire product, and sympathetically as well as practically demonstrating his friendship to the cause of Organized Labor.—*American Federationist, Samuel Gompers, Editor, Washington, D. C., July 1st.*

It would be the basest ingratitude for Union men not to show their appreciation of the manly stand you have taken regarding Organized Labor.—*Henry White, General Secretary United Garment Workers of America, New York City, June 25th.*

Your friendliness towards Organized Labor is too well known at home and abroad to be disputed, yet should any one doubt it, we will consider it a duty as well as a pleasure to place them right in the matter under the seal of this Council.—*Samuel A. Watrous, President Detroit Council Trade and Labor Unions, June 15th.*

Mr. Carhartt was the first manufacturer to advertise and push our Union Label, and Organized Labor owes him a debt of gratitude that they never can repay.—*Josephine E. Walsh, Secretary Local Union, No. 74, U. G. W. A., May 31st.*

I cannot condemn too strongly those who are seeking to besmirch the name of Hamilton Carhartt, manufacturer of the Celebrated Carhartt Overall. No man belonging to Organized Labor would be guilty of such a thing.—*H. W. Sherman, Grand Secretary International Brotherhood Electrical Workers, Washington, D. C., June 23d.*

While I firmly believe that there is no man worthy the name, or with an ounce of red blood in his veins, but what would resent the dastardly attempt to destroy my business by circulating malicious libels saying I am unfair to Organized Labor, still, that no one shall be misled, I present the above extracts from endorsements selected from the hundreds that have come to my desk. Yours Fraternally,

DETROIT, MICH.

SEPTEMBER 1st, 1904.

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Dobbs. 106 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 352 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on the subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Dobbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McMahon, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 163 illustrations. Price $1.25.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association Cloth bound; fully illustrated. Price, $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. 136 pp.; illustrated. Price $1.00.

A Special Award

Was given by the Department of Machinery of the Louisiana Purchase Exposition to the

Westinghouse Companies

For the Best, Most Complete and Most Attractive Installation

Besides numerous Gold, Silver and Bronze Medals, the following

Grand Prizes Were Awarded

Westinghouse Electric & Mfg. Co.

For Direct and Alternating Current Electric Railway Motors

For Direct and Alternating Current Generators and Motors

For Alternating Current Turbo-Generator Installation

For Static Transformers and Rotary Converters

For Mining and Industrial Electric Locomotives

For Control Systems for Single and Multiple-Unit Operation

The Name "Westinghouse" is a Guarantee

TYPE A INSULATION OF INSURANCE

Insulation implies insurance; in fact, nearly half of insurance lies in insulation.

Therefore, to insure against interruption of transformer service, it is necessary to secure insulation.

Type A insulation is close to perfection, with efficiency and regulation above the average of other transformers.

Good Advice

No. 14

One of the foremost doctors of electrical engineering was recently called upon to examine into the ills of a profitless direct-current light and power plant and, after making a diagnosis, he immediately prescribed Duncan Meters, with instructions that the remedy should be continued indefinitely to prevent a recurrence of the malady.

NORTHERN ELECTRICAL MFG. CO., - Madison, Wis., U. S. A.
Engineers Manufacturers

ANCHORS

That are cheaper to install because of the simple method of burying and the great strain that can be applied—**American Bull-Tongue Anchors** reduce the cost of the process of guying a pole by reduction in labor, they **stay solid,** they do not slip—no take up required. 21 cents worth holds 8,713 pounds, 42 cents worth holds 10,521 pounds, other money's worth in proportion.

"The Light To Work By"

FOR USE ON ALL DIRECT-CURRENT LIGHTING SYSTEMS

TYPE H-6 LAMP.

The Cooper Hewitt Mercury Vapor Lamp

gives twice the efficiency of Arc Lamps, from 7 to 9 times the efficiency of the incandescent lamp, and its wide diffusion makes it especially adapted to use in drafting rooms, machine shop, factories, offices, freight depots, etc. SEND FOR BOOKLET.

We were awarded by the Louisiana Purchase Exposition a Gold Medal for Vapor Lamps for Photo-Eograving and also the Grand Prize for Electric Lighting Work in the development of the Mercury Vapor Lamp.

Cooper Hewitt Electric Co.
220 W. 29th St. New York City

TO THE TRADE

Regarding the action brought by the American Circular Loom Company on the pretense of our product, FLEXDUCT, being an alleged infringement of the Herrick Patent, No. 456,271, under which they have been operating, would state, briefly, that their conduit made under this Herrick Patent, is known on the market as that form of Flexible Conduit in which the insides can be readily removed, and consists in construction of a coil of fiber with a wrapping of tape covering the openings in said coil, and an outside woven covering, while FLEXDUCT is a woven product throughout and does not resemble in construction the structure of the Herrick Patent in any respect.

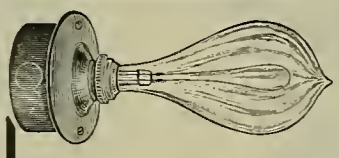
We are advised by our Attorneys, who are thoroughly familiar with the art, that we do not infringe and that ours is a broad patent fully covering and protecting our form of construction.

This action, brought at this particular time, in our opinion is simply for commercial effects, that it may confuse those who are not well informed of the facts.

The trade should not be coerced to purchase material by any threats as we will protect and defend the trade against any loss whatsoever, under any suit brought on account of the use, purchase, or sale of our product, FLEXDUCT.

Yours very truly,

OSBURN FLEXIBLE CONDUIT COMPANY
New York, 21 Park Row *Chicago, 529-30 Monadnock Block*



Some More Light on our Drawn Steel Junction Boxes

Take time to figure out the cost of cast iron boxes plus the loss from breakage and time used in producing a round hole. Compare with this the cost of drawn steel boxes.

NO BREAKAGE,

Clean round hole produced with one blow of a hammer. Write for catalog and see what you can save.

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

STROMBERG-CARLSON

GENERATOR-CALL

VISUAL SIGNAL SWITCHBOARDS

are inexpensive to maintain and nearly as rapid as a lamp signal switchboard.

SIGNALS SELF-CONTAINED

NO WORKING PARTS EXPOSED

This illustrates our No. A-1249 cabinet equipped with 100 line signals and 10 clearing-out signals. Our standard cabinets have a capacity for 50, 60, 70, 100, 140, 180 and 200 line signals of the above type.

Bulletins No. 6 and 7-E describe these boards very thoroughly. Mailed free upon request.

STROMBERG-CARLSON TELEPHONE MFG. CO.,

GENERAL OFFICES, ROCHESTER, N. Y. **WESTERN SALES OFFICE, CHICAGO, ILL.**

Kellogg Telephone Apparatus

A glance at the Kellogg desk set will prejudice you in its favor, but its working, wearing and lasting qualities are what have made its name.

It helped to win the Grand Prize at the St Louis Exposition—the highest award. Write us for catalogues telling you all about it.

A PRACTICAL BOOK FOR PRACTICAL MEN

"MODERN WIRING DIAGRAMS AND DESCRIPTIONS FOR ELECTRICAL WORKERS."

By Henry C. Horstmann and Victor H. Tousley. 160 pages, over 200 illustrations. Full leather binding, red edges. Pocket size 4 x 6. Price, net, $1 50.

A work that not only tells you how to do it, but shows you.

THIS BOOK tells how to wire for call and alarm bells. For burglar and fire alarm. How to run bells from dynamo current. How to install and manage batteries. How to test batteries. How to test circuits. How to wire for annunciators; for telegraph and gas lighting. It tells how to locate "trouble" and "ring out" circuits. It tells about meters and transformers It contains 30 diagrams of electric lighting circuits alone. It explains dynamos and motors; alternating and direct current. It gives 10 diagrams of ground detectors alone. It gives "Compensator" and Storage Battery installation. It gives simple and explicit explanations of the "Wheatstone Bridge" and its uses as well as volt meter and other testing. It gives a new and simple wiring table, covering all voltages and all losses or distances, etc., etc.

CHICAGO, U. S. A.

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

Good Advice

One of the foremost doctors of electrical engineering was recently called upon to examine into the ills of a profitless direct-current light and power plant and, after making a diagnosis, he immediately prescribed Duncan Meters, with instructions that the remedy should be continued indefinitely to prevent a recurrence of the malady.

The Hart Mfg. Co., Hartford, Conn.

New York Boston Chicago Toronto, Ont.

TO THE TRADE

Regarding the action brought by the American Circular Loom Company on the pretense of our product, FLEXDUCT, being an alleged infringement of the Herrick Patent, No. 456,271, under which they have been operating, would state, briefly, that their conduit made under this Herrick Patent, is known on the market as that form of Flexible Conduit in which the insides can be readily removed, and consists in construction of a coil of fiber with a wrapping of tape covering the openings in said coil, and an outside woven covering, while FLEXDUCT is a woven product throughout and does not resemble in construction the structure of the Herrick Patent in any respect.

We are advised by our Attorneys, who are thoroughly familiar with the art, that we do not infringe and that ours is a broad patent fully covering and protecting our form of construction.

This action, brought at this particular time, in our opinion is simply for commercial effects, that it may confuse those who are not well informed of the facts.

The trade should not be coerced to purchase material by any threats as we will protect and defend the trade against any loss whatsoever, under any suit brought on account of the use, purchase, or sale of our product, FLEXDUCT.

Yours very truly,

OSBURN FLEXIBLE CONDUIT COMPANY

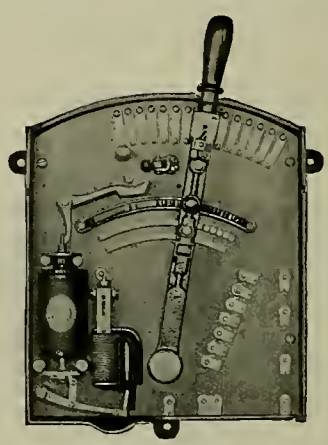
100 WILLIAM ST., NEW YORK.

Flat Bed and Small Rotary Press Controllers



One of the six "Carpenter" types.

The "Carpenter" system gives such a wide range of speed and such perfect control that a press can be moved an eighth of an inch at a time, and from that to top speed, with every desirable intermediate speed.

Six types, alike in principle, different in detail. Bulletins 81 to 86 explain. We'll send them if you let us know that you want them.

OKONITE TRADE MARK.

DON'T BUY TROUBLE

OKONITE TRADE MARK.

It costs you money, time and temper. The best way is to have the work done right at the start. Specify that all wire used in your installation shall be Okonite, that all wire joints shall be taped, first with Okonite rubber tape, then with Manson Friction tape IT IS CHEAPEST IN THE LONG RUN.

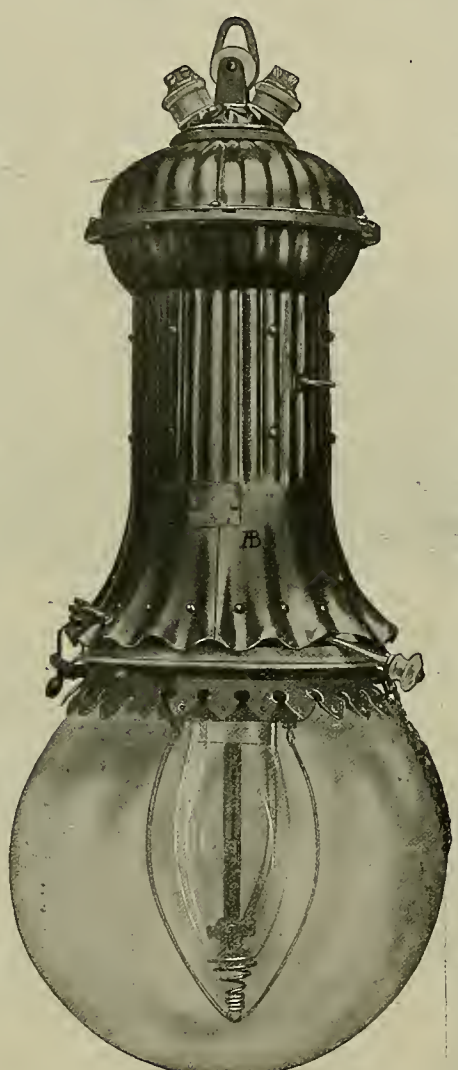
A-B ARC LAMPS

FOR ALL CIRCUITS



SPECIAL FEATURES

Accessibility of Mechanism,

Ease of Removing Inner and Outer Globe,

Ease of Trimming,

Weatherproof Construction,

Stamped Copper Cases and Simplicity of Mechanism.

THERE IS

A greater number of Adams-Bagnall Constant Direct Current Series Enclosed Arc Lamps used for street lighting throughout the United States, Canada and Mexico than all other makes of this type of lamp combined.

"THE S. K. C. SYSTEM"

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
•TRADE MARK•

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

ANCHORS

That are cheaper to install because of the simple method of burying and the great strain that can be applied—**American Bull-Tongue Anchors** reduce the cost of the process of guying a pole by reduction in labor, they **stay solid,** they do not slip—no take up required. 21 cents worth holds 8,713 pounds, 42 cents worth holds 10,521 pounds, other money's worth in proportion.

I. A. BENNETT,

FOR SALE.

PLANT OF THE UNITED STATES CARBON COMPANY including land, buildings, machinery, etc., situated on the Pennsylvania Railroad within the city limits of Cleveland, Ohio.

LAND—Vacant and covered by buildings about 2½ acres, bounded on two sides by streets and having a frontage of 348 ft. 4 in. on the Pennsylvania Railroad.

BUILDINGS—Main building is a two and one story brick building with gravel roof, the two-story part having a frontage of 191 ft. on Grand Ave., by about 50 ft. The one-story part having a frontage of 211 ft. on the switch from the Pennsylvania Railroad by about 55 ft. The shipping room is 40 ft. front on Grand Ave., by 110 ft. deep to a switch from the Pennsylvania Railroad and is a two story brick building, with gravel roof; the second floor, however, only covers a space of 14 by 40 ft. in the front part of the building. See diagram of land and buildings above.

MACHINERY—Pulleys, shafting, belting and complete machinery for the manufacture of electric-light carbons and for furnishing power, heat and light for the plant. Capacity of plant about 50,000 carbons per day.

Steam + Fuel

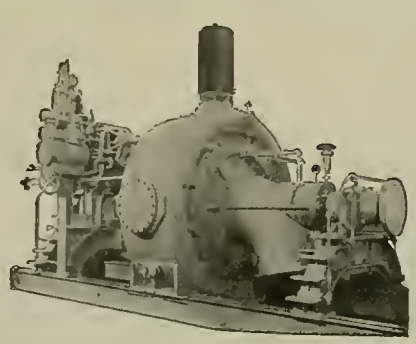
GREEN'S ECONOMIZER

Installed in Electric Light and Power Plants

Saves 10 to 20% in Fuel.
Increases Boiler Efficiency 20 to 40%.

We are doing it all over the country, and would like an opportunity to have our experts look over your plant and explain how the utilization of the waste gases will do it for you.

THE GREEN FUEL ECONOMIZER CO.
Matteawan, N. Y.



SAMSON TURBINE

The GATES on the SAMSON are so nearly BALANCED that a GOVERNOR can operate them with the GREATEST EASE. This assures CLOSE SPEED REGULATION which is desirable because it saves WEAR and TEAR in the electrical equipment

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Dobbs. 106 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 382 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on the subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Dobbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 168 illustrations. Price $1.25.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price, $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. 136 pp.; illustrated. Price $1.00.

BARGAINS IN SHELF-WORN BOOKS

You may have been looking for some of these volumes for years. Now you can get them and get them at a bargain, too. We have only one or two copies of each of the following:

	List Price	Sale Price
ELECTRICITY AS A MOTIVE POWER, by Count Th. du Moncel, London, 1883..	$3.00	$1.80
DECORATIVE ELECTRICITY, by Mrs. J. E. H. Gordon, London, 1891.....	2.50	1.50
ELECTRICAL APPLIANCES OF THE PRESENT DAY, by Major D. P. Heap, U. S. A., being a report of the Paris Electrical Exhibition of 1881.....	2.00	1.20
TABLES AND MEMORANDA FOR ELECTRICAL ENGINEERS, by Frederick Walker, C.E.	.80	.45
MAGNETISM AND ELECTRICITY, by R. Wormell	1.25	.75
STEAM HEATING DATA, by Wm. J. Baldwin, N. Y., 1897.....	.50	.30
THE TELEGRAPHIST'S GUIDE: THE NEW EXAMINATIONS OF TECHNICAL TELEGRAPHY, by Jas. Bell, A. I. E. E., London, 1895	.50	.30
THE MECHANICAL ARTS SIMPLIFIED, by D. B. Dixon, Chicago, 1897.....	2.50	1.60
ELECTRIC LIGHTING, translated from the French of Count du Moncel, by Robt. Routledge, B. S. C., London, 1883...	1.25	.75
THE ARITHMETIC OF THE STEAM ENGINE, by E. Sherman Gould, N. Y., 1897	1.00	.60
TIPS TO INVENTORS, by Robt. Grimshaw, Ph. D., N. Y., 1893.....	1.00	.60
MECHANICAL GRAPHICS, by Geo. Halliday, London, 1889	2.00	1.20
PHYSICAL UNITS, by Magnus Maclean, D. Sc.	1.00	.60
THE INDICATOR AND DYNAMOMETER, by Thos. J. Main, M. A., Philadelphia, 1883	1.50	.90
HOW TO WORK AND FIX A DYNAMO-ELECTRIC MACHINE, by W. C. Mountain..	.35	.20
THE INDICATOR HANDBOOK, by Chas. N. Pickworth	.75	.45
THE HISTORY AND PROGRESS OF THE ELECTRIC TELEGRAPH, by Robt. Sabine, C. E., London, 1869. Cloth...	1.25	.75
Paper	.75	.25
LOCAL DISTRIBUTION OF ELECTRIC POWER IN WORKSHOPS, by Ernest Kilburn Scott, A. I. E. E.	.50	.30
BEARINGS AND LUBRICATION, by A. J. Wallis-Taylor, C. E.	1.50	.90
FIRST PRINCIPLES OF MECHANICAL ENGINEERING, by Imray & Biggs, London	1.00	.60
ELECTRICITY IN OUR HOMES AND WORKSHOPS, by Sidney F. Walker, London, 1889	1.50	.90
ELECTRICITY IN THE SERVICE OF MAN, by R. Wormell, D. Sc., M. A., New York, 1886	$3.00	$1.80
THE MATHEMATICAL THEORY OF ELECTRICITY AND MAGNETISM, by Watson & Burbury, London, 1885. Vol I, Electrostatics	2.75	1.65
Vol. II, Magnetism and Electrodynamics	2.60	1.60
CHAPTERS ON ELECTRICITY, by Samuel Sheldon, Ph. D.	1.10	.65
ELECTRICITY, ITS THEORY, SOURCES AND APPLICATION, by John T. Sprague, London, 1892	6.00	3.60
MAGNETISM AND ELECTRICITY, by H. C. Tarn, M. C. P., London, 1889.....	.80	.45
ELECTRICITY UP TO DATE, by John B. Verity, M. I. E. E., London, 1896..	1.00	.60
TELEGRAPHY, by W. H. Preece and J. Sivewright, London, 1888.....	2.00	1.20
ELECTRICITY AND THE ELECTRIC TELEGRAPH, in two volumes, by Geo. B. Prescott, New York, 1888.....	7.00	4.20
USEFUL RULES AND TABLES, relating to Mensuration, Engineering, Structures and Machines, by Wm. John Macquorn Rankine, London, 1889.....	4.00	2.40
ELECTRICITY AND MAGNETISM, by Francis Nipher, A. M., St. Louis, 1895..	3.25	2.00
THE ACTION OF LIGHTNING, by Arthur Parnell, London, 1882.....	3.00	1.80
MODERN AMERICAN METHODS OF COPPER SMELTING, by Edw. Dyer Peters, Jr., M. E., New York, 1891.....	5.00	3.00
ELECTRICITY, by Fleming Jenkin, F.R.S.	.40	.25
MAGNETISM AND ELECTRICITY, by Wm. Adler Miller, M. D., LL. D., N. Y., 1888	1.50	.90
THE STEAM-BOILER CATECHISM, by Robt. Grimshaw, M. E.	2.00	1.20
THE STEAM-ENGINE CATECHISM, by Robt. Grimshaw, M. E., New York, 1896	2.00	1.20
ELECTRICAL PAPERS, Vols. I and II, by Oliver Heaviside, New York, 1894..	7.00	4.20
A GUIDE FOR THE ELECTRICAL TESTING OF TELEGRAPH CABLES, by Col. V. Hoskiaer, London, 1889.....	1.50	.90
SOLUTIONS OF THE QUESTIONS IN MAGNETISM AND ELECTRICITY, set at the Intermediate Science and Preliminary Scientific Pass Examinations of the University of London, 1860 to 1884, by F. W. Levander, London, 1885....	1.00	.40
DOMESTIC ELECTRICITY FOR AMATEURS, translated from the French of E. Hospitalier, London, 1889.....	$2.50	$1.50
FOUR LECTURES ON STATIC ELECTRIC INDUCTION, by J. E. H. Gordon, B. A., New York, 1881.....	.80	.45
CONSTRUCTION OF MILL DAMS, Jas. Leffel & Co., Springfield, O., 1874.....	2.50	1.00
A PRACTICAL TREATISE ON ELECTRIC LIGHTING, by J. E. H. Gordon, B. A., New York, 1884.....	4.50	2.70
GRAY'S TREATISE ON MAGNETISM AND ELECTRICITY, Vol. I, by Andrew Gray, LL. D., F. R. S., London, 1898	4.50	2.70
EXERCISES IN ELECTRICAL AND MAGNETIC MEASUREMENTS, by R. E. Day, M. A., London, 1889.....	1.00	.60
ELECTRICITY, by Robt. M. Ferguson, Ph. D., F. R. S. E., London, 1890...	1.50	.90
COIL AND CURRENT, OR THE TRIUMPHS OF ELECTRICITY, by Henry Frith, London, 1897.....	1.25	.75
A CENTURY OF ELECTRICITY, by T. C. Mendenhall, Cambridge, 1887.....	1.25	.75
MAGNETISM AND ELECTRICITY, by Arthur Wm. Poyser, M. A., London, 1890...	.80	.45
POTENTIAL AND ITS APPLICATION POPULARLY TREATED, by Dr. Tumlirz, London, 1889.....	1.50	.90
CONTINENTAL ELECTRIC LIGHT CENTRAL STATIONS, Killingworth Hedges, London, 1892	6.00	3.60
THEORY OF ELECTRICITY, by Linnæus Cumming, M. A., London, 1885.....	2.25	1.35
ELECTRICITY TREATED EXPERIMENTALLY, by Linnæus Cumming, M. A., London, 1891	1.50	.90
POPULAR ELECTRIC LIGHTING, by Capt. E. Ironside Bax, London, 1892.....	1.00	.60
THE AGE OF ELECTRICITY, by Park Benjamin, New York, 1892.....	2.00	1.20
THE LAW RELATING TO ELECTRIC LIGHTING, by G. Spencer Bower, B. A., London, 1889	5.00	3.00
MATHEMATICAL THEORY OF THE STEAM ENGINE, by T. Baker, C. E., London, 1890	.75	.45
ELEMENTARY TREATISE ON NATURAL PHILOSOPHY, by A. Privat Deschanel, Part 3, Electricity and Magnetism, New York, 1893	1.50	.90
ELECTRICITY IN MODERN LIFE, by G. W. De Tunzelmann, London, 1889.....	1.25	.75

ELECTRICIAN PUBLISHING CO., 510 MARQUETTE BLDG, CHICAGO

EDISON PRIMARY BATTERIES

FORMERLY EDISON-LALANDE

Extremely low internal resistance is a strong point in favor of these batteries. The internal resistance in these cells falls during the whole life of the battery. This is because the positive pole (oxide of copper) is continually reduced to metallic copper during the period that the circuit is closed. This action continually increases the size of the positive pole, thereby lowering the internal resistance. Send for Catalog No. 7.

TYPE K TRANSFORMER

MORE PEOPLE THAN EVER

Are using PITTSBURG TRANSFORMERS which simply goes to show that they are good transformers and are holding up their end in a remarkable manner. This is an important thing to us and should be to you also, as an indication that Pittsburg transformers are safe and good to buy.

WILL YOU NOT SPECIFY THEM IN YOUR NEXT ORDER?

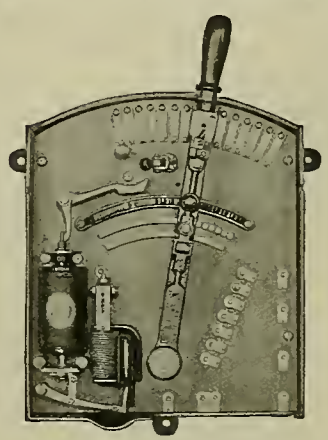
Chicago Office: Fisher Building

Flat Bed and Small Rotary Press Controllers



One of the six "Carpenter" types.

The "Carpenter" system gives such a wide range of speed and such perfect control that a press can be moved an eighth of an inch at a time, and from that to top speed, with every desirable intermediate speed.

Six types, alike in principle, different in detail. Bulletins 81 to 86 explain. We'll send them if you let us know that you want them.

The Cutler-Hammer Mfg. Co.,

Electric Controller Manufacturers and Electrical Engineers.

MILWAUKEE, WIS.

New York, Boston, Chicago, Pittsburg.

Northern Apparatus For Industrial Work

Built for service in industrial plants, to operate in isolated industries, etc. Its simplicity favors Northern Apparatus for this work, and users and those familiar with it favor Northern Apparatus also.

DIRECT CURRENT DYNAMOS AND MOTORS

Get acquainted through Bulletin No. 2535. See Northern Apparatus at Section 14, Palace of Electricity, St. Louis.

CHURCHER ALTERNATING-CURRENT RECTIFIER

will not only transform any cycle of alternating current into direct current, but will, at the same time, if desired, convert the potential of the direct current produced to a higher or lower voltage.

SOLD ON 30 DAYS' APPROVAL

Cheaper to install and operate than a motor generator. Very slight renewal costs. **Guaranteed net efficiency of 50 per cent.** Full particulars in Bulletin No. 18.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
TRADE MARK

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

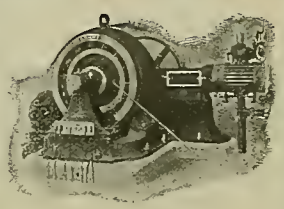
AMERICAN ELECTRIC FUSE CO.
48-50 West Jackson Boul.
CHICAGO, ILL.

Warren Alternator



Very little attention has been paid to decorating the machine with fancy ornaments and a great deal of thought has been put into making the machine durable; it impresses one with its simplicity and capacity for severe acting service. No commutator, no moving wire, no trouble. As an investment, they are gilt-edged securities. They are "seven league boots" in the chase for the almighty dollar.

"THE S. K. C. SYSTEM"

We were awarded the **Grand Prize** by the **Louisiana Purchase Exposition** for Electric Lighting Work in the development of the **Mercury Vapor Lamps** and also a **Gold Medal** for Vapor Lamps for Photo Engraving

Type H-6 Lamp

This is merely proof that our claims for the efficiency of the

Cooper Hewitt Mercury Vapor Lamps

are based upon positive merit of the highest order and assures purchasers that we have long passed the experimental stage of our work and have a proposition of great commercial value.

For 35 per cent. of your present lighting cost we can furnish you with a light that is far superior to work by and the extreme diffusion of which overcomes the difficulties heretofore experienced in adequately lighting such places as Machine Shops, Factories, Mills, Offices, Freight Depots, Piers, etc.

BEARDSLEE CHANDELIER M'F'G. CO. 256 AND 257 SO. CANAL ST. CHICAGO
GAS & ELECTRIC FIXTURES FOR THE TRADE.
CATALOG SENT PREPAID TO DEALERS MENTION THIS PAPER

TO THE TRADE

Regarding the action brought by the American Circular Loom Company on the pretense of our product, FLEXDUCT, being an alleged infringement of the Herrick Patent, No. 456,271, under which they have been operating, would state, briefly, that their conduit made under this Herrick Patent, is known on the market as that form of Flexible Conduit in which the insides can be readily removed, and consists in construction of a coil of fiber with a wrapping of tape covering the openings in said coil, and an outside woven covering, while FLEXDUCT is a woven product throughout and does not resemble in construction the structure of the Herrick Patent in any respect.

We are advised by our Attorneys, who are thoroughly familiar with the art, that we do not infringe and that ours is a broad patent fully covering and protecting our form of construction.

This action, brought at this particular time, in our opinion is simply for commercial effects, that it may confuse those who are not well informed of the facts.

The trade should not be coerced to purchase material by any threats as we will protect and defend the trade against any loss whatsoever, under any suit brought on account of the use, purchase, or sale of our product, FLEXDUCT.

Yours very truly,

OSBURN FLEXIBLE CONDUIT COMPANY

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.

CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.

CHAPTER 28. Metallic Circuit.
29. Underground Wires
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

Published and for sale by ELECTRICIAN PUBLISHING CO., 510 Marquette Building, Chicago

THE AUTOMATIC

is the recognized competitive system of telephony. Its manifold advantages over the manual system, mechanically, financially and commercially, make it so. Automatic telephone service is more prompt and more accurate and absolutely secret. It can be furnished at less cost to both company and patrons than any other. Progressive Independent telephone companies all over the country are rapidly adopting it; the new ones in preference to manual and the old ones to replace manual equipment. It is a success everywhere.

Among the cities in which it has been adopted are:

Chicago, Ill.
Grand Rapids, Mich.
Columbus, Ohio
Dayton, Ohio
Lincoln, Neb.
Portland, Maine

Auburn, N. Y.
Lewiston, Maine
Auburn, Maine
Fall River, Mass.
New Bedford, Mass.
Los Angeles, Cal.

San Diego, Cal.
Hopkinsville, Ky.
Sioux City, Iowa
Cleburne, Texas
Columbus, Ga.
Augusta, Ga.

Medford, Wis.
St. Mary's, Ohio
Woodstock, N. B.
Westerly, R. I.
Berlin, Germany
Manchester, Iowa

Princeton, N. J.
Albuquerque, N. M.
Van Wert, Ohio
Battle Creek, Mich.
Clayton, Mo.

Pentwater, Mich.
Toronto Junction, Can.
Wilmington, Del.
Riverside, Cal.
Traverse City, Mich.

Standard Double-Truck Car, Equipped With Four 100 H. P. Westinghouse Single-Phase Railway Motors.
The above car is one of the equipment in regular service on the Interworks Railway Trafford City———Wilmerding, Pa.

The Westinghouse Single-Phase Railway System

Is no experiment, but an accomplished fact

Ten roads are now in course of construction, the cars being equipped with a total of 218 motors, representing 15,435 H. P.

The system has many advantages; two of them are:

1. High trolley voltages are allowable. This means saving in copper and power.
2. The transforming points contain no machinery with moving parts, rendering constant attendance unnecessary.

Good Advice

One of the foremost doctors of electrical engineering was recently called upon to examine into the ills of a profitless direct-current light and power plant and, after making a diagnosis, he immediately prescribed Duncan Meters, with instructions that the remedy should be continued indefinitely to prevent a recurrence of the malady.

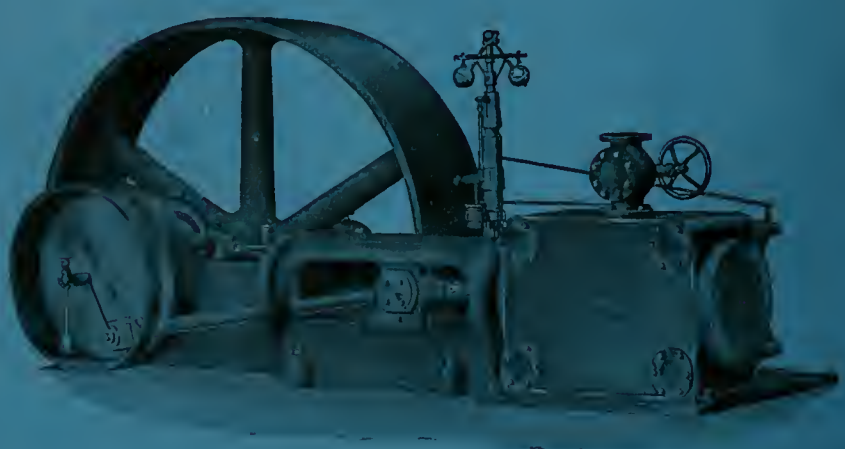
Everybody Knows

We make the largest
Engines in the world

But Do You Know

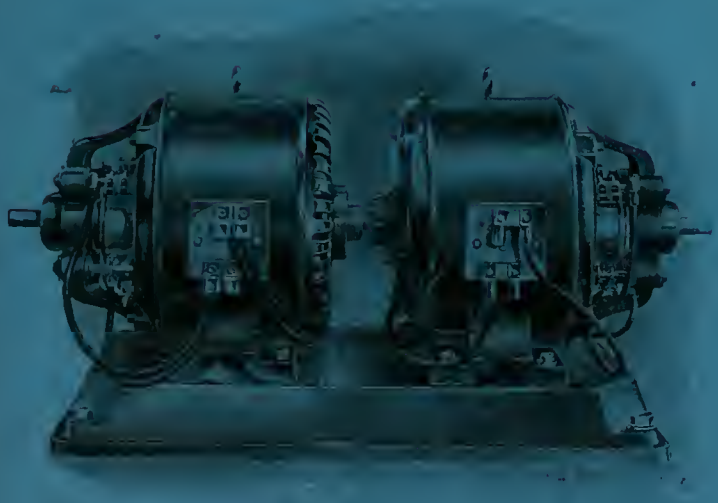
We make smaller Engines, in sizes from 25 Horsepower upward

?



Allis-Chalmers Standard Corliss Engine

Corliss Engines for all power purposes



Bullock Motors

for operating Machine Tools.

Bullock

(Patented) Three-Wire Multiple Voltage Balancing System for control of Motors, received the

Highest Award at the St. Louis Exposition

Many of the largest machine shops in the country are operating their tools on the Bullock (Patented) Multiple Voltage System.

When a motor operating on their system is set at any speed, it will run at that speed regardless of the load.

As many as twelve different speeds forward or backward can be secured through this system.

Will you ever again buy cables as cheap as now?

Not unless copper takes a long drop—and none of us looks for that. On the present copper market we are selling cables way below what we should. That is plain to any man who figures it. Advances are certain, and coming quick.

Big orders are coming in, and more in sight. Every one needs cable—mostly big lots. Deliveries will be choked as badly as in 1902 and 1903. (Remember them?)

Business is already heavier than most buyers think. Those now under cover are wise, because they will get *their* cables on time, and at present prices.

Profitable contracts for future delivery may be made now if you send us your specifications. Buy enough for all of 1905. It will be good property.

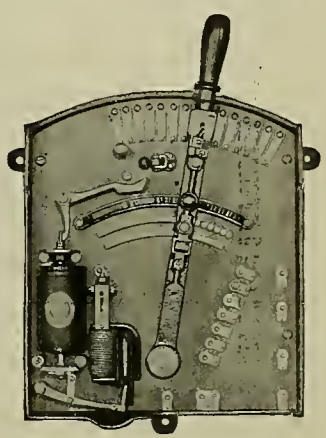
Flat Bed and Small Rotary Press Controllers



One of the six "Carpenter" types.

The "Carpenter" system gives such a wide range of speed and such perfect control that a press can be moved an eighth of an inch at a time, and from that to top speed, with every desirable intermediate speed.

Six types, alike in principle, different in detail. Bulletins 81 to 86 explain. We'll send them if you let us know that you want them.

CROCKER-WHEELER

Alternators

for Lighting and Power

CROCKER-WHEELER STANDARD REVOLVING FIELD ENGINE TYPE ALTERNATOR

As American licensees of the celebrated Swiss engineers Brown, Boveri & Cie., we are able to build alternating current generators of the same excellence as our long-established direct current apparatus.

ADDRESS INQUIRIES TO OUR CHICAGO OFFICE, 12 OLD COLONY BLDG. OR TO

Crocker-Wheeler Company

Manufacturers and Electrical Engineers

AMPERE, N. J.

We were awarded the **Grand Prize** by the **Louisiana Purchase Exposition** for Electric Lighting Work in the development of the **Mercury Vapor Lamps** and also a **Gold Medal** for Vapor Lamps for Photo Engraving

Type H-6 Lamp

This is merely proof that our claims for the efficiency of the

Cooper Hewitt Mercury Vapor Lamps

are based upon positive merit of the highest order and assures purchasers that we have long passed the experimental stage of our work and have a proposition of great commercial value.

For 35 per cent. of your present lighting cost we can furnish you with a light that is far superior to work by and the extreme diffusion of which overcomes the difficulties heretofore experienced in adequately lighting such places as Machine Shops, Factories, Mills, Offices, Freight Depots, Piers, etc.

100 WILLIAM ST., NEW YORK.

ANCHORS

That are cheaper to install because of the simple method of burying and the great strain that can be applied—**American Bull-Tongue Anchors** reduce the cost of the process of guying a pole by reduction in labor, they **stay solid,** they do not slip—no take up required. 21 cents worth holds 8,713 pounds, 42 cents worth holds 10,521 pounds, other money's worth in proportion.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

HIGHEST GRADE NUERNBERG

CARBONS

in their circular, dated November 23, 1903, which in part reads as follows:

"The Western Electric Company have made an exhaustive test of carbons of all kinds and have found that the 'ELECTRA' Carbons cannot be equaled in quality or efficiency, produce practically no dust and give an excellent and steady light. They produce the highest standard of candlepower in proportion to the current consumed, and are the most economical carbons manufactured."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY.

"FLEXDUCT"

is a trade name for a flexible non-metallic conduit that is approved by all official inspection boards.

"Flexduct" is a tough fiberous tubing, being flexible, strong and enduring. It is a moisture repellant. "Flexduct" has a smooth, even interior, unaffected by swashing, crushing or sharp bends. It is indestructable. Greater lengths can be fished, time saved in construction and a higher class job is possible with "Flexduct."

Osburn Flexible Conduit Company,

New York Chicago San Francisco

"FLEXDUCT"

is for sale by all electrical jobbers. If local dealer cannot furnish, write us and we will arrange for prompt shipment. Specify "Flexduct."

Cope's Patent Quick Coupling Conduit Rod

Remember these rods have no lost motion.
These Couplings are of Steel and are made in the best possible manner.

Write for list of persons using these rods—26,000 sold since May 1902. Made in 3 ft. and 4 ft. lengths.
Price, 3 ft. 75 cents, 4 ft. 85 cents.
Patented February 24, 1903.

Two 150-h. p. Porter-Allen engines, 14x20 inches, 230 revolutions.
One 150-h. p. Russell engine, 15x20 inches, 230 revolutions.
One 125-h. p. Hamilton Corliss, 16x30 inches, 90 revolutions.

GENERATORS.

Three 150-k. w. 250-volt Westinghouse generators. These generators directly connected to three 250-h. p. Ball engines.
Four 42.5-k. w. 125-volt Mather generators.
Four 37½-k. w. 250-volt Mather generators.
Four 37½-k. w. 125-volt Mather generators.

SWITCHBOARDS.

Two switchboards, with switches, measuring instruments, rheostats, etc., for control of above generators.

Another plant complete except boilers, consisting of the following principal items:

ENGINES.

Two Lane & Bodley Corliss engines, 24-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Lane & Bodley Corliss engines, 30-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Ball engines, cylinders 20-inch diameter, 18-inch stroke, 150 revolutions.
One Westinghouse vertical compound engine, with cylinders 16 inches and 26 inches x 18-inch stroke.
One Westinghouse vertical compound engine, with cylinders 18 inches and 30 inches diameter x 18-inch stroke.

GENERATORS.

Two Edison bipolar generators, 150 k. w., 500 volts.
Two C. & C. bipolar generators, 100 k. w., 500 volts.
One C. & C. bipolar generator, 30 k. w., 500 volts.
Two T.-H., alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 100 k. w.
Ten 100-light 9.6-ampere multiple circuit Brush arc machines.
One 60-light 9.6-ampere wood arc machine.

SWITCHBOARD.

Switchboard, with all switches, transformers, measuring instruments, etc., for control of above generators.

SHAFTING.

Two lines shafting, together with pedestal, hearings, clutches, pulleys, etc., used in connection with the large Corliss engines.

Both plants located in Cincinnati.
We will consider bids for all or any part of the above.
Bids must be made f. o. b. Cincinnati.

In supplying boilers with hot purified water, thus keeping a larger heating surface, as well as meeting sudden demands for power, the

GREEN'S ECONOMIZER

is but beginning its savings to plant owners. What has been, and possibly will again be—cost of fuel—one of the greatest expenses of a plant, is reduced from 10 to 20 per cent. ELECTRIC LIGHT AND POWER PLANTS having a Green's Economizer realize the greatest saving. We will be pleased to send our free booklet showing construction and how applied.

SAMSON TURBINE

Almost every one knows that for a given amount of power, the quicker the speed of a turbine, the better. This is due to the fact that LIGHTER and consequently CHEAPER TRANSMISSION MACHINERY can be used. The SAMSON has a QUICKER SPEED than any other turbine of the same dimensions operating under the same conditions.

HIPWELL

Expanding Wire Guard; also manufacturer of high-grade, long-distance

TELEPHONES

Switchboards and Cable Terminals.

Hipwell Mfg. Co.
ALLEGHENY, PA.

THE AUTOMATIC

is the recognized competitive system of telephony. Its manifold advantages over the manual system, mechanically, financially and commercially, make it so. Automatic telephone service is more prompt and more accurate and absolutely secret. It can be furnished at less cost to both company and patrons than any other. Progressive Independent telephone companies all over the country are rapidly adopting it; the new ones in preference to manual and the old ones to replace manual equipment. It is a success everywhere.

Among the cities in which it has been adopted are:

Chicago, Ill.
Grand Rapids, Mich.
Columbus, Ohio
Dayton, Ohio
Lincoln, Neb.
Portland, Maine
Auburn, N. Y.
Lewiston, Maine
Auburn, Maine
Fall River, Mass.

"THE FOUR-TRACK SERIES"
This is the title of a series of books of travel and education issued by the Passenger Department of the
NEW YORK CENTRAL LINES
These small books are filled with information regarding the best modes of travel and the education that can best be obtained by travel.
They relate specifically to the great resorts of America — to trips to the islands of the sea and around the world.
They also contain numerous illustrations and new and accurate maps of the country described.
A copy of the 40-page Illustrated Catalogue of the "Four Track Series" will be sent free postpaid, upon receipt of postage stamp by George H. Daniels, General Passenger Agt., New York Central & Hudson River Railroad, Grand Central Station, New York.

CENTRAL STATION HEATING
We are the originators and builders of the underground system of live and exhaust steam heating. Our system is used for the utilization and distribution of exhaust steam from electric and power plants for heating purposes. 250 Plants in successful operation. We have the only Meter System. Also manufacturers of Wooden Water Pipe, Steam Pipe Casing, Steam Traps, Condensation Meters, Valves, Economizing Coils, Separators and full line of Steam Fitters' Supplies.

Good Advice

One of the foremost doctors of electrical engineering was recently called upon to examine into the ills of a profitless direct-current light and power plant and, after making a diagnosis, he immediately prescribed Duncan Meters, with instructions that the remedy should be continued indefinitely to prevent a recurrence of the malady.

"FLEXDUCT"

is a trade name for a flexible non-metallic conduit that is approved by all official inspection boards.

"Flexduct" is a tough fibrous tubing, being flexible, strong and enduring. It is a moisture repellant. "Flexduct" has a smooth, even interior, unaffected by swashing, crushing or sharp bends. It is indestructible. Greater lengths can be fished, time saved in construction and a higher class job is possible with "Flexduct."

Osburn Flexible Conduit Company,

New York Chicago San Francisco

"FLEXDUCT"

is for sale by all electrical jobbers. If local dealer cannot furnish, write us and we will arrange for prompt shipment. Specify "Flexduct."

WESTON Electrical Instrument Co.,

Waverly Park, NEWARK, N. J.

"Just As Good As Day Light"

No Shadows, No Glare, No Flicker.

Cooper Hewitt Mercury Vapor Lamps

TYPE H-6 LAMP.

diffuse their light so that it strikes your work from all sides. There is no "standing in your own light." There is no need of adjusting brackets, cords or lamp holder. The cost is but 35% of other Electric Lighting. There is no consumption of light-giving element and no need of trimming. Have twice the efficiency of the arc lamp and from 7 to 9 times the efficiency of the incandescent.

Especially adapted for use in drafting rooms, machine shops, press rooms, factories and offices.

Send for Booklet.

For Direct Current Systems Only.

We were awarded by the Louisiana Purchase Exposition a Gold Medal for Vapor Lamps for Photo-Eograving and also the Grand Prize for Electric Lighting Work in the development of the Mercury Vapor Lamp.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
TRADE MARK

HIGHEST GRADE NUERNBERG

CARBONS

in their circular letter dated October 7, 1904, which in part reads as follows:

"It seems almost an unnecessary proceeding to write a letter advertising the 'ELECTRA' Carbon, or to dwell upon its merits, to any great extent, inasmuch as the 'ELECTRA' Carbon is the STANDARD OF PERFECTION, to which all other manufacturers of carbons endeavor to reach. We think this is a sufficient recommendation in itself.

If you have not been using these carbons in your arc lamps, it would certainly pay you to give them a trial. You will find that the expenses of trimming are reduced from 15 to 20 per cent."

IMPORTANT TELEPHONE BOOKS.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a reliable treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

AMERICAN TELEPHONE PRACTICE. By Kempster B. Miller, M. E. 510 pp. 380 illustrations. Price $3.00.
This is the first complete treatise on telephony in the English language. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

THE INSPECTOR AND TROUBLE MAN. By A. E. Dobbs. 166 pp. Price $1.00.
A practical book, written in plain language. Full of information and diagrams for the operator, exchange manager, inspector, trouble man and lineman. A complete description of telephones, how to find and remedy their troubles, together with working plans for exchange construction, complete with diagrams of all up-to-date telephones and switchboards.

A, B, C, OF THE TELEPHONE. By J. E. Homans, A. M. 352 pp. 269 illustrations. Price $1.00.
Owing to the demand for a comprehensive book giving a clear, terse idea of the principles governing the construction, installation, care and management of telephones and their appliances, this book has been compiled. It has been the aim of the author to make this the most complete elementary book on the subject for the practical electrician, wireman, lineman and engineer, and it is written in a clear and careful style.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

PRACTICAL FEATURES OF TELEPHONE WORK. By A. E. Dobbs. 134 pp. Price 75 cents.
A simple, plain-speaking handbook for the practical telephone man.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Eighth edition. 16mo, 48 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Sixth edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pp. 333 illustrations. Price $4.50.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp. 168 illustrations. Price $1.25.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price, $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. B. Cary. 136 pp.; illustrated. Price $1.00.

The Above, or Any Other Electrical Work Published, Sent on Receipt of Price.

FOR SALE.

Central Station Equipments

One Plant Complete Consisting of the Following Principal Items:

BOILERS.

Six 200-h. p. Stirling water-tube boilers, equipped for Hawley down-draft furnaces.
Two 150-h. p. Stirling boilers, with plain grates.

HEATERS.

Two 250-h. p. Hoppes open heaters.
Two 400-h. p. Excelsior heaters.

PUMPS.

Two 7x4½x10 Laidlaw Dunn boiler feeders for 150 pounds' pressure.

ENGINES.

Three 250-h. p. Ball tandem compound engines, 15x25x16 inches, 200 revolutions.
Two 150-h. p. Porter-Allen engines, 14x20 inches, 230 revolutions.
One 150-h. p. Russell engine, 15x20 inches, 230 revolutions.
One 125-h. p. Hamilton Corliss, 16x30 inches, 90 revolutions.

GENERATORS.

Three 150-k. w. 250-volt Westinghouse generators. These generators directly connected to three 250-h. p. Ball engines.
Four 42.5-k. w. 125-volt Mather generators.
Four 37½-k. w. 250-volt Mather generators.
Four 37½-k. w. 125-volt Mather generators.

SWITCHBOARDS.

Two switchboards, with switches, measuring instruments, rheostats, etc., for control of above generators.
Another plant complete except boilers, consisting of the following principal items:

ENGINES.

Two Lane & Bodley Corliss engines, 24-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Lane & Bodley Corliss engines, 30-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Bull engines, cylinders 20-inch diameter, 18-inch stroke, 150 revolutions.
One Westinghouse vertical compound engine, with cylinders 16 inches and 26 inches x 18-inch stroke.
One Westinghouse vertical compound engine, with cylinders 18 inches and 30 inches diameter x 18-inch stroke.

GENERATORS.

Two Edison bipolar generators, 150 k. w., 500 volts.
Two C. & C. bipolar generators, 100 k. w., 500 volts.
One C. & C. bipolar generator, 30 k. w., 500 volts.
Two T.-H., alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 100 k. w.
Ten 100-light 9.6-ampere multiple circuit Brush arc machines.
One 60-light 9.6-ampere wood arc machine.

SWITCHBOARD.

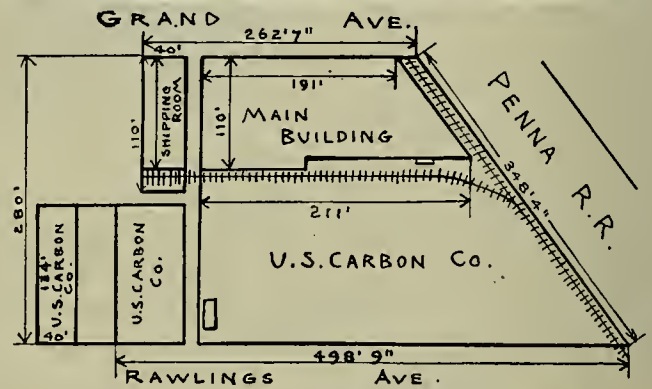
Switchboard, with all switches, transformers, measuring instruments, etc., for control of above generators.

SHAFTING.

Two lines shafting, together with pedestal, bearings, clutches, pulleys, etc., used in connection with the large Corliss engines.

Both plants located in Cincinnati.
We will consider bids for all or any part of the above.
Bids must be made f. o. b. Cincinnati.

The Cincinnati Gas & Electric Co.



FOR SALE.

PLANT OF THE UNITED STATES CARBON COMPANY including land, buildings, machinery, etc., situated on the Pennsylvania Railroad within the city limits of Cleveland, Ohio.

LAND—Vacant and covered by buildings about 2½ acres, bounded on two sides by streets and having a frontage of 348 ft. 4 in. on the Pennsylvania Railroad.

BUILDINGS—Main building is a two and one story brick building with gravel roof, the two-story part having a frontage of 191 ft. on Grand Ave., by about 50 ft. The one-story part having a frontage of 211 ft. on the switch from the Pennsylvania Railroad by about 55 ft. The shipping room is 40 ft. front on Grand Ave., by 110 ft. deep to a switch from the Pennsylvania Railroad and is a two story brick building, with gravel roof; the second floor, however, only covers a space of 14 by 40 ft. in the front part of the building. See diagram of land and buildings above.

MACHINERY—Pulleys, shafting, belting and complete machinery for the manufacture of electric-light carbons and for furnishing power, heat and light for the plant. Capacity of plant about 50,000 carbons per day.

Diesel Engines

Suitable for all stationary power operating on CRUDE or FUEL oil

By Gradual Continuous Combustion
NO EXPLOSIONS

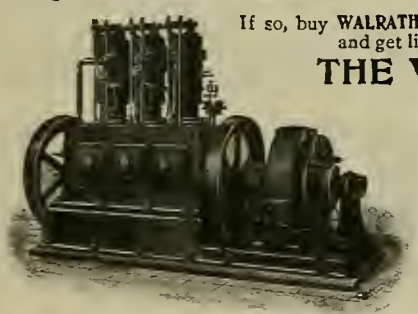
GUARANTEED COST OF FUEL WITH OIL AT 4 CENTS PER GALLON:

4.5 mills per K. W. Hour on the full load.
5.1 mills per K. W. Hour on the half load.

For Further Particulars Apply to
AMERICAN DIESEL ENGINE COMPANY
11 Broadway, - New York

There's No Friction
with the Fibre-Graphite Commutator Brush. Being 90 per cent. pure graphite, it insures low resistance, no sparking under a varying load, and longer wear. There is no greasing required. The Fibre-Graphite is therefore the most economic brush on the market. Send for price list.
HOLMES FIBRE-GRAPHITE MFG. CO.
5155 Wakefield St., Germantown, PHILADELPHIA.

ARE YOU LOOKING FOR MONEY?



If so, buy WALRATH GAS OR GASOLINE ENGINES and get light on the subject.

THE WALRATH

Received the Highest Award at the Pan-American Exposition.

It will produce as good a commercial light as that of an automatic steam engine, either belted or direct-connected generator. Simple, Economical and Reliable

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permaneot Magoets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current: How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light: How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers, Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel, Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

The unusual length of unit, the light weight and the simplicity of joining unit to unit make the amount of conduit laid per man per day greater than in other conduits and greatly lessens the cost of an underground system.

American Conduit Co.

TELEPHONE PRINCIPLES AND PRACTICE

A NEW BOOK IN TELEPHONY

By

GEORGE WALKER WILDER, PH. D.

Professor in Telephony in the Armour Institute of Technology

Complete and up-to-date, written by a practical man. All about modern telephone apparatus, their principles and use:

I. Fundamental Ideas
II. Telephone Apparatus
III. Systems of Communication
IV. Construction and Equipment

IN 32 CHAPTERS, 450 PAGES, 375 ILLUSTRATIONS. PRICE $2.00 POSTPAID.

Send Postal Money Order to

THE CANTWELL PRESS - Madison, Wis.

THE AUTOMATIC

is the recognized competitive system of telephony. Its manifold advantages over the manual system, mechanically, financially and commercially, make it so. Automatic telephone service is more prompt and more accurate and absolutely secret. It can be furnished at less cost to both company and patrons than any other. Progressive Independent telephone companies all over the country are rapidly adopting it; the new ones in preference to manual and the old ones to replace manual equipment. It is a success everywhere.

Among the cities in which it has been adopted are:

Chicago, Ill.
Grand Rapids, Mich.
Columbus, Ohio
Dayton, Ohio
Lincoln, Neb.
Portland, Maine
Auburn, N. Y.
Lewiston, Maloe
Auburn, Maine
Fall River, Mass.
New Bedford, Mass.
Los Angeles, Cal.
San Diego, Cal.
Hopkinsville, Ky.
Sioux City, Iowa
Cleburne, Texas
Columbus, Ga.
Augusta, Ga.
Medford, Wis.
St. Mary's, Ohio
Woodstock, N. B.
Westerly, R. I.
Berlin, Germany
Manchester, Iowa
Princeton, N. J.
Albuquerque, N. M.
Van Wert, Ohio
Battle Creek, Mich.
Clayton, Mo.
Pentwater, Mich.
Toronto Junction, Can.
Wilmington, Del.
Riverside, Cal.
Traverse City, Mich.

"THE FOUR-TRACK SERIES"

This is the title of a series of books of travel and education issued by the Passenger Department of the

NEW YORK CENTRAL LINES

These small books are filled with information regarding the best modes of travel and the education that can best be obtained by travel.

They relate specifically to the great resorts of America — to trips to the islands of the sea and around the world.

They also contain numerous illustrations and new and accurate maps of the country described.

A copy of the 40-page Illustrated Catalogue of the "Four Track Series" will be sent free postpaid, upon receipt of postage stamp by George H. Daniels, General Passenger Agt., New York Central & Hudson River Railroad, Grand Central Station, New York.

Have YOU read the

NEW DYNAMO TENDERS' HAND-BOOK

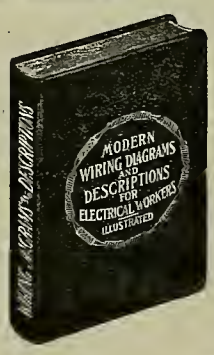
By F. B. BADT?

IF NOT, WHY NOT?

Dynamo tenders cannot get along without it.

Sent prepaid on receipt of price, $1.00.

ELECTRICIAN PUBLISHING CO.,
510 Marquette Building, - CHICAGO.



A PRACTICAL BOOK FOR PRACTICAL MEN

"MODERN WIRING DIAGRAMS AND DESCRIPTIONS FOR ELECTRICAL WORKERS."

By Henry C. Horstmann and Victor H. Tousley. 160 pages, over 200 illustrations. Full leather binding, red edges. Pocket size 4 x 6. Price, net, $1.50.

A work that not only tells you how to do it, but shows you.

THIS BOOK tells how to wire for call and alarm bells. For burglar and fire alarm. How to run bells from dynamo current. How to install and manage batteries. How to test batteries. How to test circuits. How to wire for annunciators; for telegraph and gas lighting. It tells how to locate "trouble" and "ring out" circuits. It tells about meters and transformers. It contains 30 diagrams of electric lighting circuits alone. It explains dynamos and motors; alternating and direct current. It gives 10 diagrams of ground detectors alone. It gives "Compensator" and Storage Battery installation. It gives simple and explicit explanations of the "Wheatstone Bridge" and its uses as well as volt meter and other testing. It gives a new and simple wiring table, covering all voltages and all losses or distances, etc., etc.

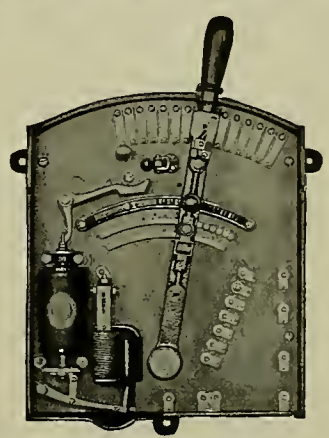
Flat Bed and Small Rotary Press Controllers



One of the six "Carpenter" types.

The "Carpenter" system gives such a wide range of speed and such perfect control that a press can be moved an eighth of an inch at a time, and from that to top speed, with every desirable intermediate speed.

Six types, alike in principle, different in detail. Bulletins 81 to 86 explain. We'll send them if you let us know that you want them.

No Shadows, No Glare, No Flicker.

Cooper Hewitt Mercury Vapor Lamps

TYPE H-6 LAMP.

diffuse their light so that it strikes your work from all sides. There is no "standing in your own light." There is no need of adjusting brackets, cords or lamp holder. The cost is but 35% of other Electric Lighting. There is no consumption of light-giving element and no need of trimming. Have twice the efficiency of the arc lamp and from 7 to 9 times the efficiency of the incandescent.

Especially adapted for use in drafting rooms, machine shops, press rooms, factories and offices.

Send for Booklet.

For Direct Current Systems Only.

We were awarded by the Louisiana Purchase Exposition a Gold Medal for Vapor Lamps for Photo-Engraving and also the Grand Prize for Electric Lighting Work in the development of the Mercury Vapor Lamp.

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
TRADE MARK

HIGHEST GRADE NUERNBERG

CARBONS

in their circular letter dated October 7, 1904, which in part reads as follows:

"It seems almost an unnecessary proceeding to write a letter advertising the 'ELECTRA' Carbon, or to dwell upon its merits, to any great extent, inasmuch as the 'ELECTRA' Carbon is the STANDARD OF PERFECTION, to which all other manufacturers of carbons endeavor to reach. We think this is a sufficient recommendation in itself.

If you have not been using these carbons in your arc lamps, it would certainly pay you to give them a trial. You will find that the expenses of trimming are reduced from 15 to 20 per cent."

HUGO REISINGER, Sole Importer, 11 Broadway, NEW YORK CITY

THE BEST **BRAZING TORCH**

FOR ELECTRICIANS

HOTTEST ON EARTH

The Turner 4B Gasoline Brazing Torch is used by all mechanics for light work in brazing, annealing, tempering and drawing temper of small tools, etc. This torch produces an intensely hot, pointed flame of over 3,000° Fahr. Burns 4 hours from one filling.

"FLEXDUCT"
is a trade name for a flexible non-metallic conduit that is approved by all official inspection boards.

"Flexduct" is a tough fibrous tubing, being flexible, strong and enduring. It is a moisture repellant. "Flexduct" has a smooth, even interior, unaffected by swashing, crushing or sharp bends. It is indestructible. Greater lengths can be fished, time saved in construction and a higher class job is possible with "Flexduct."

The R. E.-A. L. Monitor Bell.
(Patented.)

Hammer rod supported in two places and thrown straight out and in by the armature, striking gong on inside, near edge, thus giving a full, clear tone.
All springs made of Phosphor Bronze and so formed that there is least possible strain.
Contacts are platinized, adjustment is made by pressure on the standard which supports one contact. No screws or nuts being used in the adjustment, bell does not get out of order by operation.
Ordinarily the weak point is the pivot, the unreliable one the adjusting screw and nut. As these defects have been eliminated, this bell will stand hard usage and operate under adverse conditions.
The hammer entirely concealed by gong and cannot be tampered with.
It is especially adapted for use on street cars, as in addition to the advantages mentioned, it is dust, insect and moisture proof.

FOR SALE.
Central Station Equipments

One Plant Complete Consisting of the Following Principal Items:

BOILERS.

Six 200-h. p. Stirling water-tube boilers, equipped for Hawley down-draft furnaces.
Two 150-h. p. Stirling boilers, with plain grates.

HEATERS.

Two 250-h. p. Hoppes open heaters.
Two 400-h. p. Excelsior heaters.

PUMPS.

Two 7x4½x10 Laidlaw Dunn boiler feeders for 150 pounds' pressure.

ENGINES.

Three 250-h. p. Ball tandem compound engines, 15x25x16 inches, 200 revolutions.
Two 150-h. p. Porter-Allen engines, 14x20 inches, 230 revolutions.
One 150-h. p. Russell engine, 15x20 inches, 230 revolutions.
One 125-h. p. Hamilton Corliss, 16x30 inches, 90 revolutions.

GENERATORS.

Three 150-k. w. 250-volt Westinghouse generators. These generators directly connected to three 250-h. p. Ball engines.
Four 42.5-k. w. 125-volt Mather generators.
Four 37½-k. w. 250-volt Mather generators.
Four 37½-k. w. 125-volt Mather generators.

SWITCHBOARDS.

Two switchboards, with switches, measuring instruments, rheostats, etc., for control of above generators.
Another plant complete except boilers, consisting of the following principal items:

ENGINES.

Two Lane & Bodley Corliss engines, 24-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Lane & Bodley Corliss engines, 30-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Ball engines, cylinders 20-inch diameter, 18-inch stroke, 150 revolutions.
One Westinghouse vertical compound engine, with cylinders 16 inches and 26 inches x 18-inch stroke.
One Westinghouse vertical compound engine, with cylinders 18 inches and 30 inches diameter x 18-inch stroke.

GENERATORS.

Two Edison bipolar generators, 150 k. w., 500 volts.
Two C. & C. bipolar generators, 100 k. w., 500 volts.
One C. & C. bipolar generator, 30 k. w., 500 volts.
Two T.-H., alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 100 k. w.
Ten 100-light 9.6-ampere multiple circuit Brush arc machines.
One 60-light 9.6-ampere wood arc machine.

SWITCHBOARD.

Switchboard, with all switches, transformers, measuring instruments, etc., for control of above generators.

SHAFTING.

Two lines shafting, together with pedestal, bearings, clutches, pulleys, etc., used in connection with the large Corliss engines.

Both plants located in Cincinnati.
We will consider bids for all or any part of the above.
Bids must be made f. o. b. Cincinnati.

170 Broadway, New York — *336 Macy St., Los Angeles*

THE AUTOMATIC

is the recognized competitive system of telephony. Its manifold advantages over the manual system, mechanically, financially and commercially, make it so. Automatic telephone service is more prompt and more accurate and absolutely secret. It can be furnished at less cost to both company and patrons than any other. Progressive Independent telephone companies all over the country are rapidly adopting it; the new ones in preference to manual and the old ones to replace manual equipment. It is a success everywhere.

Among the cities in which it has been adopted are:

Chicago, Ill.
Grand Rapids, Mich.
Columbus, Ohio
Dayton, Ohio
Lincoln, Neb.
Portland, Maine
Auburn, N. Y.
Lewiston, Maine
Auburn, Maine
Fall River, Mass.
New Bedford, Mass.

"THE FOUR-TRACK SERIES"

This is the title of a series of books of travel and education issued by the Passenger Department of the

NEW YORK CENTRAL LINES

These small books are filled with information regarding the best modes of travel and the education that can best be obtained by travel.

They relate specifically to the great resorts of America — to trips to the islands of the sea and around the world.

They also contain numerous illustrations and new and accurate maps of the country described.

A copy of the 40-page Illustrated Catalogue of the "Four Track Series" will be sent free, postpaid, upon receipt of postage stamp by George H. Daniels, General Passenger Agt., New York Central & Hudson River Railroad, Grand Central Station, New York.

A VALUABLE BOOK OF REFERENCE.

TELEPHONES—Their CONSTRUCTION and FITTING.

A Practical Treatise on the Fitting-up and Maintenance of Telephones and the Auxiliary Apparatus.

BY F. C. ALLSOP.

CONTENTS:

CHAPTER I.—Receivers; II.—Transmitters; III.—Magneto Switch-Bells; IV.—Battery Switch-Bells; V.—Complete Instruments; VI.—Switches, Switchboards and Extension Bells; VII.—Batteries for Telephone Work; VIII.—Erecting Wires, Instruments, Etc.; IX.—Arranging the Circuits; X.—Intercommunicating System; XI.—Testing for and Removing Faults.

184 PAGES. 156 ILLUSTRATIONS AND FOLDING PLATES. PRICE, $1.25.
Sent prepaid on receipt of price.

ELECTRICIAN PUBLISHING CO., 510 Marquette Bldg., Chicago.

READ THE BLUE ELECTRICAL PAPER.

SOMETHING NEW!

"PIG" AND "STAG'S HEAD" LAMPS

The accompanying cuts show our latest novelties in

SPECIAL AND MINIATURE LAMPS.

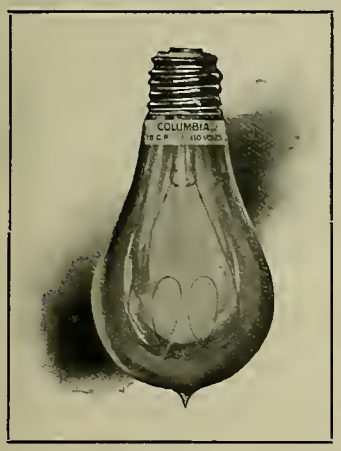
The Stag's Head lamp is a "real burning" incandescent lamp equipped with either standard Edison base or candelabra base; voltage 104, 110, 115 or any normal voltage.

The "Pig" is made in two sizes, one for candelabra and the other for regular socket; made to fit any Edison socket.

If Interested, Write for More Details and Prices.

STERLING ELECTRICAL MFG. CO.
WARREN, O.

NEW YORK: 100 William St. SAN FRANCISCO: Crossby Bldg. CHICAGO: 1610 Masonic Temple.



COLUMBIA LAMPS

Are furnished in accordance with the most rigid specifications. We invite a comparison of the COLUMBIA with other makes and request central stations and isolated plants to make thorough and comprehensive tests for life, sustained candle-power and total illuminated area. LET US SEND YOU OUR PROPOSAL FORM.

Columbia Lamps are manufactured under a License to use the Chemical Exhaust Process of exhausting lamps. This process is vitally necessary in the production of the highest quality of Lamp.

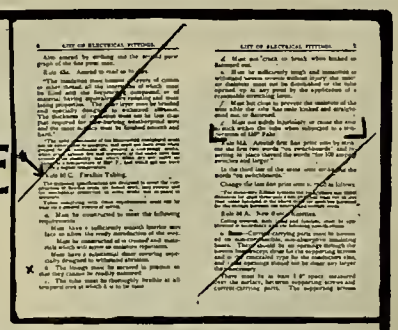
NATIONAL ELECTRICAL CODE



The New Standard
An Established Fact

"Flexduct" the standard flexible non-metallic conduit is an established fact. The highest interpretation of the new code for safety, durability and strength. "Flexduct" is the practical conduit for practical workmen. The high standard desired by all men. "Flexduct" smooth interior and indestructible features make wiring easy. For sale by all electrical jobbers and supply houses. Specify "Flexduct," do not accept substitution, as there is no duct but "Flexduct." No equal, no combination of ideal qualities such as found in Flexduct.

THE WORK OF THE NIGHT SHIFT

is usually less productive than that done by day on account of the inconvenience caused by artificial light.

Notice in this picture taken at 10 p. m. how perfectly tools are lighted at night by

The Cooper Hewitt

Mercury Vapor Lamps

In such a plant the night is just as good as day for working.

The extreme diffusion of light prevents the usual shadows from getting in the way of the work, and the freedom from glare or flicker makes it "just as good as daylight."

The cost of this superior light is only 35 per cent. of what you are now paying, and in addition there is no trimming needed and no consumption of light-giving element.

Adapted to all **Direct-Current Systems.** For use in Mills, Factories, Printing Shops, Photographic Establishments, Docks, Freight Houses, Draughting Rooms and Offices. Send for Booklet.

It Can't Be Beat—The Guthrie Flasher

A SIGN FLASHER WITHOUT A MOTOR

Agents Wanted

A FEW ADVANTAGES OF THIS FLASHER OVER ALL OTHERS:

First.—The Price is lower.
Second.—It has fewer parts and is therefore the simplest flasher on the market.
Third.—It has no motor to cause trouble and consume current.
Fourth.—It costs nothing to operate this flasher.
Fifth.—It only occupies a space of 5 x 8 inches.
Sixth.—It can be regulated to flash any signs or show window lights in any manner desired.

Any combination of lights, without motor or cylinder.
Simplest and best on the market.
Works on any current.
The disadvantage of a flasher was the motor question.
We have overcome this and are putting out an article that meets a long felt want.

"THE S. K. C. SYSTEM"

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

ELECTRA
TRADE MARK

HIGHEST GRADE NUERNBERG

CARBONS

n their circular letter dated October 7, 1904, which in part reads as follows:

"It seems almost an unnecessary proceeding to write a letter advertising the 'ELECTRA' Carbon, or to dwell upon its merits, to any great extent, inasmuch as the 'ELECTRA' Carbon is the STANDARD OF PERFECTION, to which all other manufacturers of carbons endeavor to reach. We think this is a sufficient recommendation in itself.

If you have not been using these carbons in your arc lamps, it would certainly pay you to give them a trial. You will find that the expenses of trimming are reduced from 15 to 20 per cent."

THE
Standard Motor Starter of the World

Copied by almost every starter maker. Prompt prosecutions of infringements and the upholding of our patents by the courts prevented its duplication.

The strongest proof that it is as we claim, "the least expensive motor starter safe to use on any installation," is found in the attempts to build as much like it as possible without infringing.

A telephone system of 160 subscribers and 80 miles of toll lines. Located in county seat town of 1,500 inhabitants. System all new and up-to-date, only been in a year. Reason it's for sale is to settle an estate. Address, T. H. MINOR, Troy, Mo.

PROPOSAL

SANITARY DISTRICT OF CHICAGO TO CONTRACTORS

Sealed Proposals Addressed to the Board of Trustees of the Sanitary District of Chicago and Indorsed:

"Proposals for furnishing and installing alternating-current generators and generators for exciters" will be received by the clerk of the said Sanitary District at Room 1110 Security Building, Chicago, Ill., until 12 m. (standard time) of Wednesday, the 15th day of February, A. D. 1905, and will be publicly opened by said board of trustees at a meeting of the board held that day.

The generators for which tenders are invited consist of four 4,000-kilowatt, 6,600-volt, three-phase, 60-cycle generators, 164 revolutions per minute and two 350-kilowatt, 250-volt, direct-current generators, 300 revolutions per minute.

Each bid must be accompanied by a certified check or cash to the amount of three thousand ($3,000) dollars. All certified checks must be drawn on some responsible bank doing business in the city of Chicago and made payable to the order of the clerk of the Sanitary District of Chicago. Said amount of three thousand ($3,000) dollars deposited with bids will be held by the Sanitary District until all of the respective bids for said installation have been canvassed and the contract awarded and signed, the return of said check or cash being conditioned upon the appearance within ten (10) days after receiving notice of award to him of the bidder to whom the award of said work shall have been made, with bondsmen, and executing a contract with the Sanitary District for the work so awarded and giving a bond satisfactory to the board of trustees for the fulfillment of the contract for furnishing and installing the generators and exciters in the sum of fifty thousand ($50,000) dollars.

All bids must be made upon blank forms furnished by the Sanitary District.

No bid will be considered unless the party making it shall furnish evidence satisfactory to the board of trustees that he has constructed and has in successful operation generators of practically as large capacity as those called for by this advertisement and his financial ability successfully to prosecute the said contract in case the same shall be awarded to him.

Bidders are required to state in their bids their individual names and places of residence in full.

The said board of trustees reserves the right to reject any and all bids.

THE SANITARY DISTRICT OF CHICAGO.
By Zina R. Carter, President of its Board of Trustees.
Attest: S. D. Griffin, Clerk.

Central Station Equipments

One Plant Complete Consisting of the Following Principal Items:

BOILERS.

Six 200-h. p. Stirling water-tube boilers, equipped for Hawley down-draft furnaces.
Two 150-h. p. Stirling boilers, with plain grates.

HEATERS.

Two 250-h. p. Hoppes open heaters.
Two 400-h. p. Excelsior heaters.

PUMPS.

Two 7x4½x10 Laidlaw Dunn boiler feeders for 150 pounds' pressure.

ENGINES.

Three 250-h. p. Hall tandem compound engines, 15x25x16 inches, 200 revolutions.
Two 150-h. p. Porter-Allen engines, 14x20 inches, 230 revolutions.
One 150-h. p. Russell engine, 15x20 inches, 230 revolutions.
One 125-h. p. Hamilton Corliss, 16x30 inches, 90 revolutions.

GENERATORS.

Three 150-k. w. 250-volt Westinghouse generators. These generators directly connected to three 250-h. p. Ball engines.
Four 42.5-k. w. 125-volt Mather generators.
Four 37½-k. w. 250-volt Mather generators.
Four 37½-k. w. 125-volt Mather generators.

SWITCHBOARDS.

Two switchboards, with switches, measuring instruments, rheostats, etc., for control of above generators.

Another plant complete except boilers, consisting of the following principal items:

ENGINES.

Two Lane & Bodley Corliss engines, 24-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Lane & Bodley Corliss engines, 30-inch diameter cylinders, 48-inch stroke, 70 revolutions.
Two Ball engines, cylinders 20-inch diameter, 18-inch stroke, 150 revolutions.
One Westinghouse vertical compound engine, with cylinders 16 inches and 26 inches x 18-inch stroke.
One Westinghouse vertical compound engine, with cylinders 18 inches and 30 inches diameter x 18-inch stroke.

GENERATORS.

Two Edison bipolar generators, 150 k. w., 500 volts.
Two C. & C. bipolar generators, 100 k. w., 500 volts.
One C. & C. bipolar generator, 30 k. w., 500 volts.
Two T.-H., alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 150 k. w.
Two Fort Wayne, alternating current, 133 cycles, 1,100 volts, 100 k. w.
Ten 100-light 9.6-ampere multiple circuit Brush arc machines.
One 60-light 9.6-ampere wood arc machine.

SWITCHBOARD.

Switchboard, with all switches, transformers, measuring instruments, etc., for control of above generators.

SHAFTING.

Two lines shafting, together with pedestal, bearings, clutches, pulleys, etc., used in connection with the large Corliss engines.

Both plants located in Cincinnati.
We will consider bids for all or any part of the above.
Bids must be made f. o. b. Cincinnati.

"THE FOUR-TRACK SERIES"

This is the title of a series of books of travel and education issued by the Passenger Department of the

NEW YORK CENTRAL LINES

These small books are filled with information regarding the best modes of travel and the education that can best be obtained by travel.

They relate specifically to the great resorts of America — to trips to the islands of the sea and around the world.

They also contain numerous illustrations and new and accurate maps of the country described.

A copy of the 40-page Illustrated Catalogue of the "Four Track Series" will be sent free, postpaid, upon receipt of postage stamp by George H. Daniels, General Passenger Agt., New York Central & Hudson River Railroad, Grand Central Station, New York.

BITUMINIZED FIBER CONDUIT

FOR UNDERGROUND CONSTRUCTION

Bituminized Fiber Conduit is made with the idea of combining the good and eliminating the bad features of other conduits, and incorporating valuable features not found in other ducts. Testimonials, which we are getting from users, point to the fact that we have succeeded.

TELEPHONE PRINCIPLES AND PRACTICE

A NEW BOOK IN TELEPHONY

By

GEORGE WALKER WILDER, PH. D.

Professor in Telephony in the Armour Institute of Technology

Complete and up-to-date, written by a practical man. All about modern telephone apparatus, their principles and use:

I. Fundamental Ideas
II. Telephone Apparatus
III. Systems of Communication
IV. Construction and Equipment

IN 32 CHAPTERS, 460 PAGES, 375 ILLUSTRATIONS. PRICE $2.00 POSTPAID.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

THE AUTOMATIC

is the recognized competitive system of telephony. Its manifold advantages over the manual system, mechanically, financially and commercially, make it so. Automatic telephone service is more prompt and more accurate and absolutely secret. It can be furnished at less cost to both company and patrons than any other. Progressive Independent telephone companies all over the country are rapidly adopting it; the new ones in preference to manual and the old ones to replace manual equipment. It is a success everywhere.

Among the cities in which it has been adopted are:

Chicago, Ill.
Grand Rapids, Mich.
Columbus, Ohio
Dayton, Ohio
Lincoln, Neb.
Portland, Maine
Auburn, N. Y.
Lewiston, Maine
Auburo, Maine
Fall River, Mass.

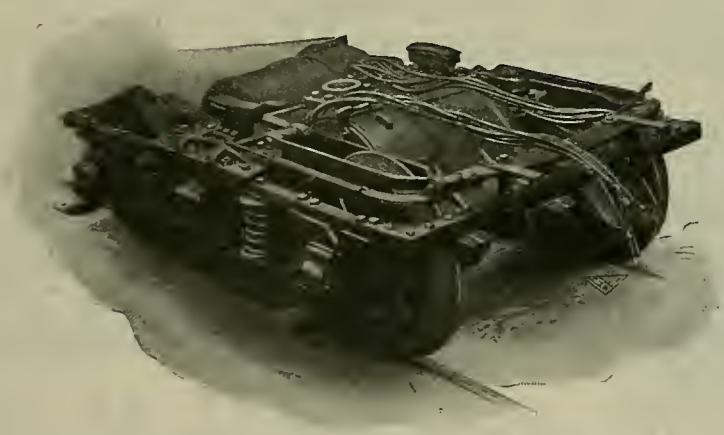
The Westinghouse Single-Phase Railway System

100 H. P. Westinghouse Single-Phase Railway Motor.



A Pair of 100 H. P. Westinghouse Single-Phase Railway Motors, Mounted on Standard Truck.

Advantages

Generating and distributing systems cheapest to install.

Existing lines operated by direct current can be easily and economically converted.

Only one charged conductor used.

The controlling apparatus simpler than that of direct-current system.

Conversion losses are reduced and consequent economy in energy effected.

New Year--New Standard.

We all at least have a fleeting thought of the next year being a better year. How to get it? Is it not by higher standards? Higher standards in anything give promise of better results.

"Flexduct" is the higher standard Flexible conduit. The new standards just adopted by those who know mean endurance, safety, less labor and surer results.

Where is this new standard more faithfully interpreted than in "Flexduct." No questions asked if you use "Flexduct", the known standard.

CENTRAL STATION MANAGERS

Don't Be Afraid

of the Gas Plant

WORK UP A MOTOR LOAD

We can furnish you

SINGLE PHASE MOTORS

that will start under full load in sizes ranging from 1/8 to 35 H. P.

Wagner Electric Mfg. Co.
ST. LOUIS, MO., U. S. A.

COLUMBIA LAMPS

Are furnished in accordance with the most rigid specifications. We invite a comparison of the COLUMBIA with other makes and request central stations and isolated plants to make thorough and comprehensive tests for life, sustained candle-power and total illuminated area. LET US SEND YOU OUR PROPOSAL FORM.

Columbia Lamps are manufactured under a License to use the Chemical Exhaust Process of exhausting lamps. This process is vitally necessary in the production of the highest quality of Lamp.

THE WORK OF THE NIGHT SHIFT

is usually less productive than that done by day on account of the inconvenience caused by artificial light.

Notice in this picture taken at 10 p. m. how perfectly tools are lighted at night by

The Cooper Hewitt

Mercury Vapor Lamps

In such a plant the night is just as good as day for working.

The extreme diffusion of light prevents the usual shadows from getting in the way of the work, and the freedom from glare or flicker makes it "just as good as daylight."

The cost of this superior light is only 35 per cent. of what you are now paying, and in addition there is no trimming needed and no consumption of light-giving element.

Adapted to all **Direct-Current Systems**. For use in Mills, Factories, Printing Shops, Photographic Establishments, Docks, Freight Houses, Draughting Rooms and Offices. Send for Booklet.

THE

Standard Motor Starter of the World

Copied by almost every starter maker. Prompt prosecutions of infringements and the upholding of our patents by the courts prevented its duplication.

The strongest proof that it is as we claim, "the least expensive motor starter safe to use on any installation," is found in the attempts to build as much like it as possible without infringing.

THE CUTLER HAMMER MFG. CO.

NEW YORK BOSTON MILWAUKEE, WIS. CHICAGO PITTSBURG

It Will Interest You to Know What the **Western Electric Company** Have to Say Regarding

HIGHEST GRADE NUERNBERG

CARBONS

ELECTRA
•TRADE MARK•

n their circular letter dated October 7, 1904, which in part reads as follows:

"It seems almost an unnecessary proceeding to write a letter advertising the 'ELECTRA' Carbon, or to dwell upon its merits, to any great extent, inasmuch as the 'ELECTRA' Carbon is the STANDARD OF PERFECTION, to which all other manufacturers of carbons endeavor to reach. We think this is a sufficient recommendation in itself.

If you have not been using these carbons in your arc lamps, it would certainly pay you to give them a trial. You will find that the expenses of trimming are reduced from 15 to 20 per cent."

The New Years Number of the Western Electrician will be a noteworthy contribution to electrical journalism. In addition to having a handsome cover which competent critics have pronounced a beautiful specimen of color printing, this number will contain many special and valuable features which will appeal to the electrical public.

A large attractive advertising announcement in this excellent number would prove beneficial to your business.

SAMSON TURBINE

If the SPEED of the turbine is to be controlled by a GOVERNOR, the turbine should be of such capacity that it will develop the MAXIMUM POWER required, when operating at ¾ to ⅞ gate, then when an overload is thrown on the governor can open the gates wider and allow an increase in power. The EFFICIENCY of the SAMSON between ¾ and ⅞ gate is over 84%.

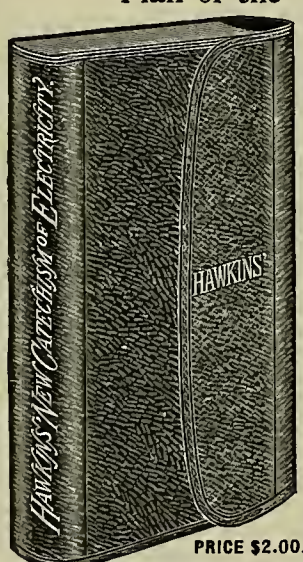
CENTRAL TELEPHONE AND ELECTRIC CO.,
909 Market St.,
ST. LOUIS, U. S. A.

HAWKINS' NEW CATECHISM OF ELECTRICITY.

Plan of the Work, Contents, Etc.



PRICE $2.00.

The New Catechism of Electricity will be found to be surprisingly plain, and free from useless and ambiguous terms. The plan upon which it is arranged is unique.

The book is, first of all, intended to be plain and instructive; some 300 illustrations have been introduced, so that the mere pictures will afford almost a knowledge of the subjects.

It is a school book from the manner in which it proceeds from the simple facts to the abstract principles which the facts indicate; it is also a book of reference through the index of seventeen double columns of fine type pages; by means of this index a thousand items of practical importance are at once available.

It is an up-to-date work, which has cost a large outlay of capital and time, and, in short, it is doubtful if any more attractive book has ever been issued—or one more useful.

The subjects treated upon are as follows: Dedication to Thomas A. Edison, with engraving of Mr. Edison; Preface and Introduction; Nature and Source of Electricity and Magnetism.

The Dynamo; Conductors and Non-Conductors; Symbols, abbreviations and definitions relating to electricity; Parts of the Dynamo; The Motor; The Care and Management of the Dynamo and Motor.

Electric Lighting; Wiring; The rules and requirements of the National Board of Underwriters in full; Electrical Measurements.

The Electric Railway; Line Work; Instruction and Cautions for Linemen and the Dynamo Room; Storage Batteries; Care and Management of the Street Car Motor; Electro Plating.

The Telephone and Telegraph; The Electric Elevator; Accidents and Emergencies, etc., etc.

The full one-third part of the whole work has been devoted to the explanation and illustrations of the dynamo, and particular directions relating to its care and management;—all the directions are given in the simplest and most kindly way to assist rather than confuse the learner. The names of the various parts of the machine are also given with pictorial illustrations of the same.

In the Catechism no less than 25 full page illustrations have been given of the various dynamo machines made in different parts of the country, and an equal number of part page illustrations.

LOS ANGELES CLEVELAND PHILADELPHIA

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

Published and for sale by ELECTRICIAN PUBLISHING CO., 510 Marquette Building, Chicago

THE AUTOMATIC

is the recognized competitive system of telephony. Its manifold advantages over the manual system, mechanically, financially and commercially, make it so. Automatic telephone service is more prompt and more accurate and absolutely secret. It can be furnished at less cost to both company and patrons than any other. Progressive Independent telephone companies all over the country are rapidly adopting it; the new ones in preference to manual and the old ones to replace manual equipment. It is a success everywhere.

Among the cities in which it has been adopted are:

Chicago, Ill.
Grand Rapids, Mich.
Columbus, Ohio
Dayton, Ohio
Lincoln, Neb.
Portland, Maine
Auburn, N. Y.
Lewiston, Maine
Auburn, Maine
Fall River, Mass.
New Bedford, Mass.
Los Angeles, Cal.
San Diego, Cal.
Hopkinsville, Ky.
Sioux City, Iowa
Cleburne, Texas
Columbus, Ga.
Augusta, Ga.
Medford, Wis.
St. Mary's, Ohio
Woodstock, N. B.
